Unisort® Circula® Key Features

A Base Unit

Pull-to-open door with lockable base available.
Standard **UC7010G**
Lockable **UC7020G**

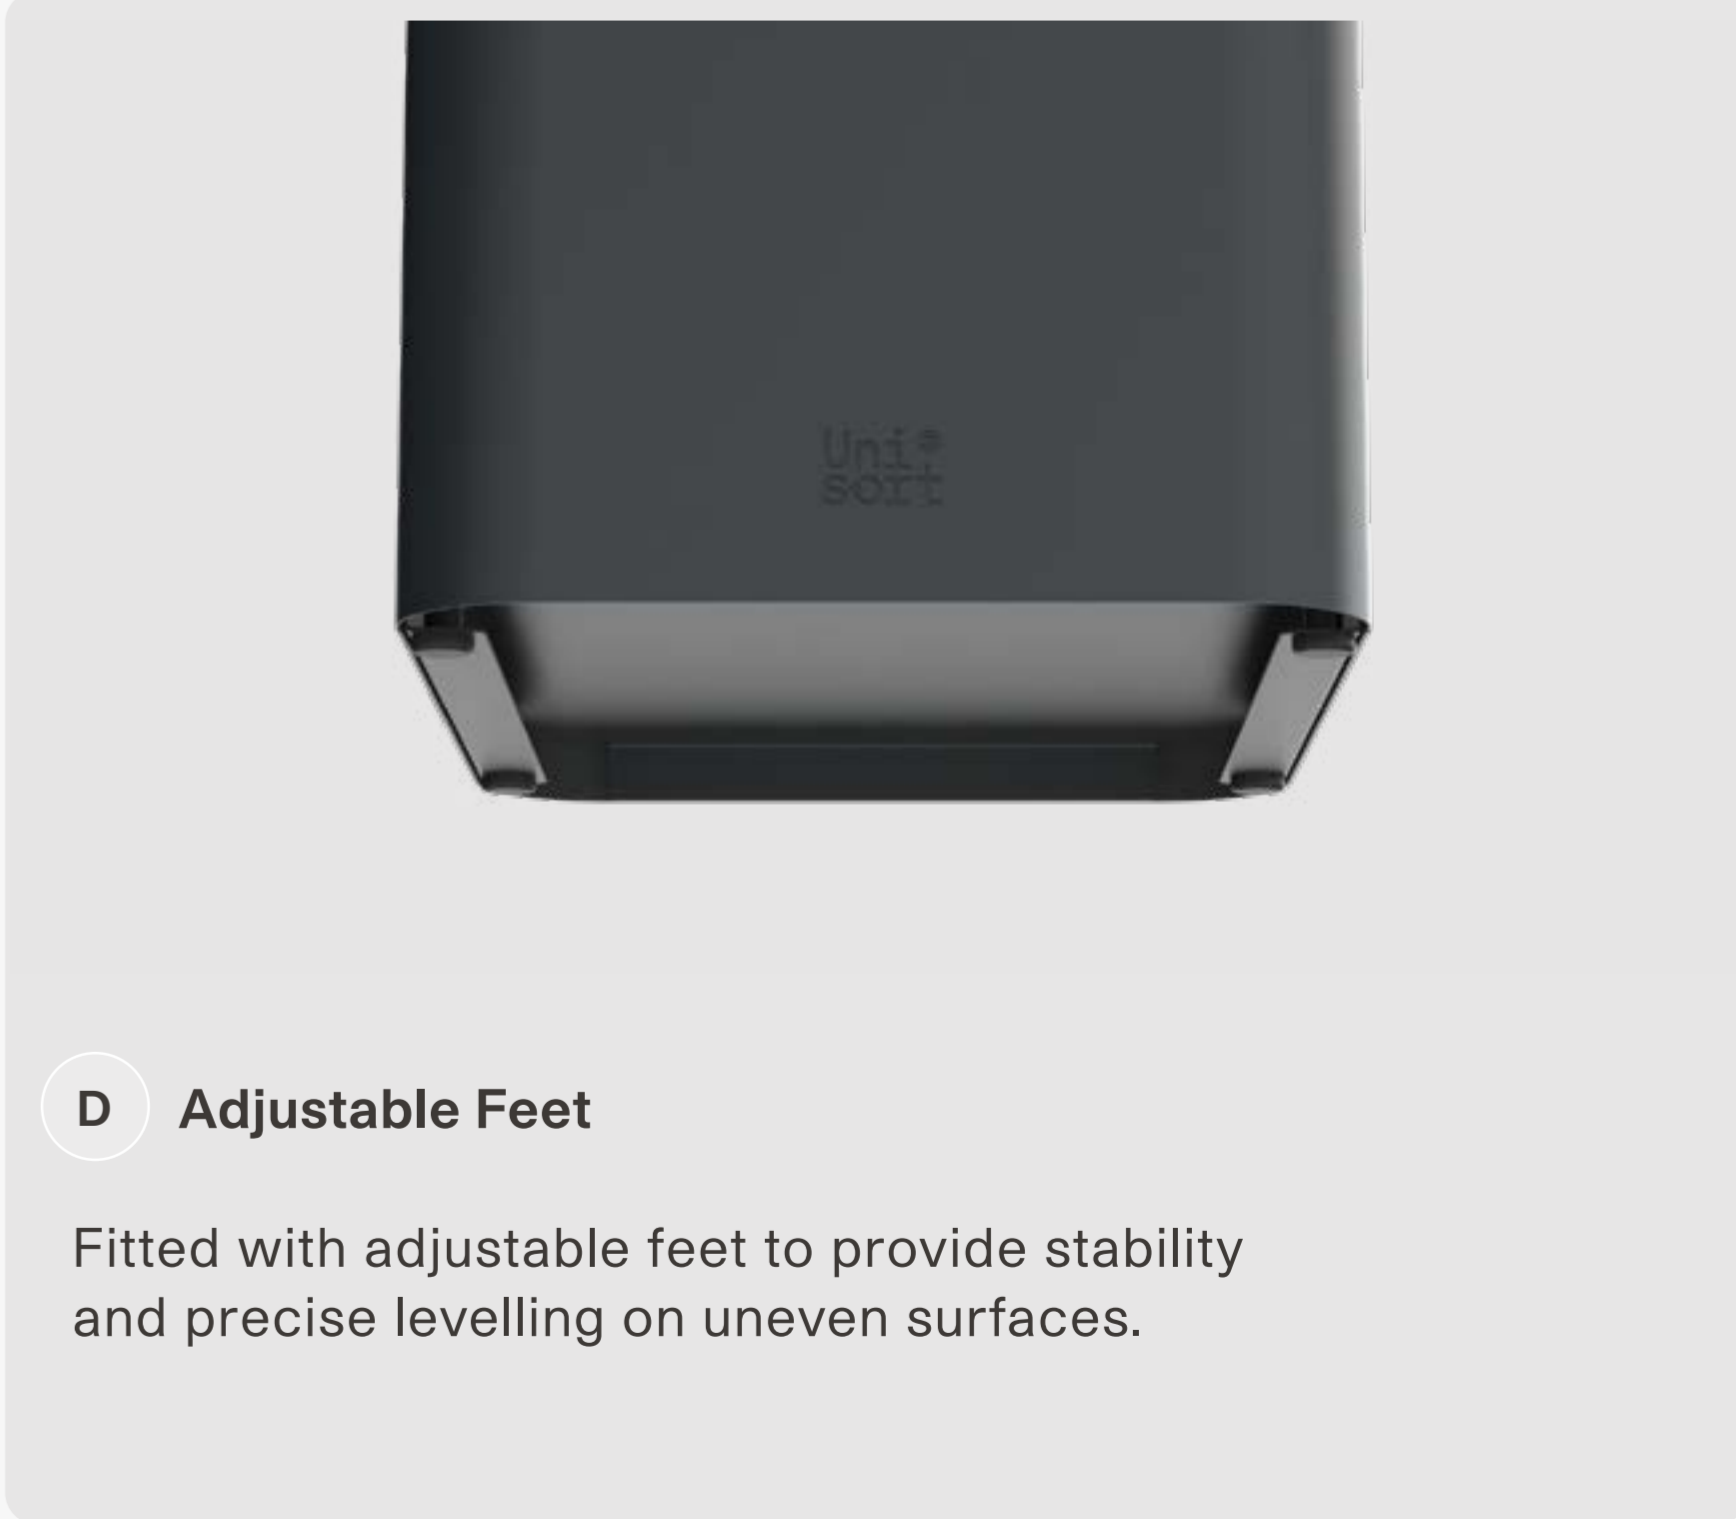

B Waste Stream Apertures

Specific shape apertures make correct waste stream separation easy.
5 options

C Unisort Liner System Compatible

Reduce your plastic use by up to 80% and decrease your CO₂ emissions by using our Liner System instead of 'standard' bags.

D Adjustable Feet

Fitted with adjustable feet to provide stability and precise levelling on uneven surfaces.

How To Choose Your Unisort® Circula® Recycling Station

Once you have defined the number of locations on site that need recycling stations, use the following steps.

1 2 3 4 5 6

Waste Streams
Decide what waste streams you will collect. Separate Liquids & Food Waste to avoid contamination.

1 2 3 4 5 6

Aperture Options
Interchangeable Waste Stream Apertures. Powdercoated and Bamboo finishes available.

1 2 3 4 5 6

Liner System
Use the clever Unisort Liner System to save 80% in plastic – Standard bags can also be used.

1 2 3 4 5 6

Accessories
A range of time and labour saving options.

1 2 3 4 5 6

Signage Accessories - Backboard Waste Stream Signage
Full colour, edge-to-edge print in any design customised with your waste streams, colours, fonts and logos.

Front Door Waste Stream Signage
Add adhesive backed decals in front of the Door.

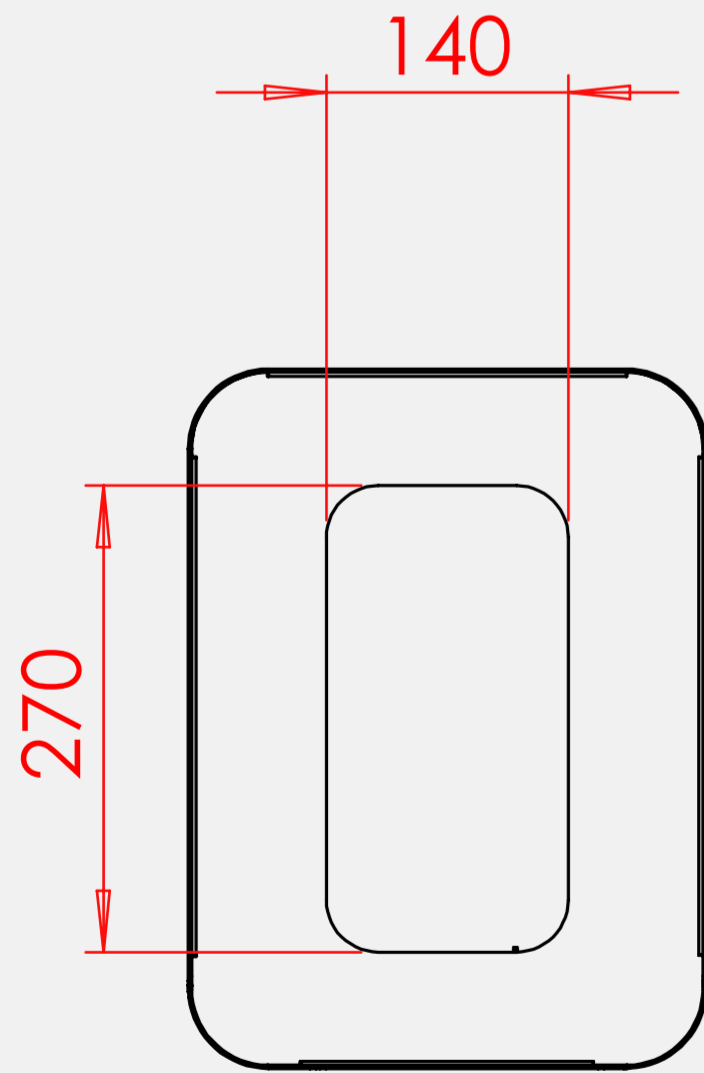

1 2 3 4 5 6

Signage Accessories - Worktop Waste Stream Signage
Adhesive backed cover decals.

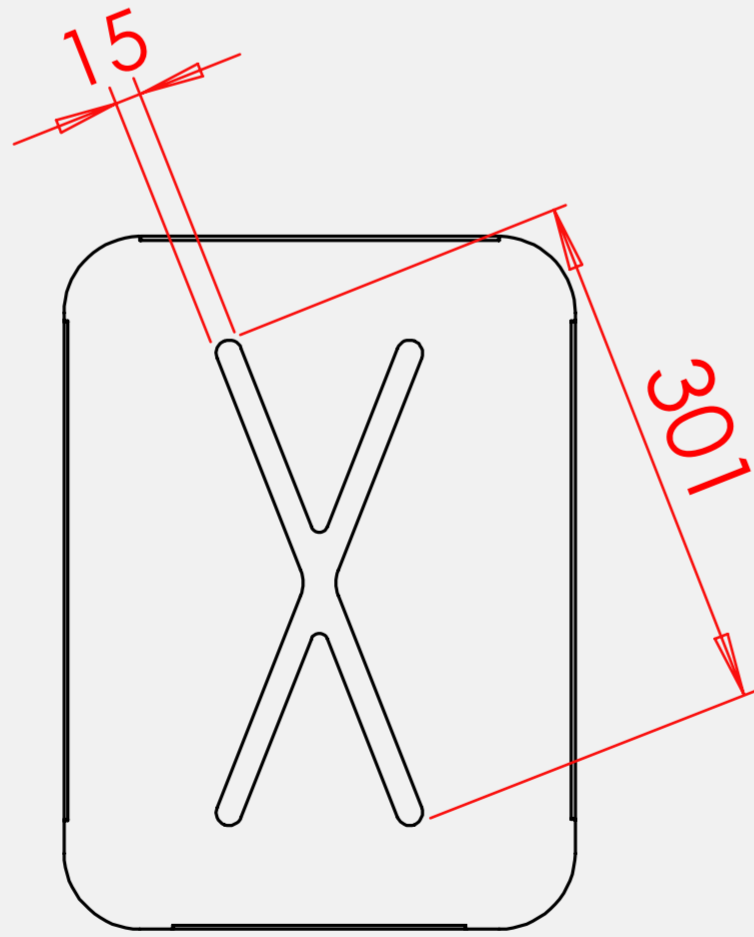

Aperture Options

Open Apertures

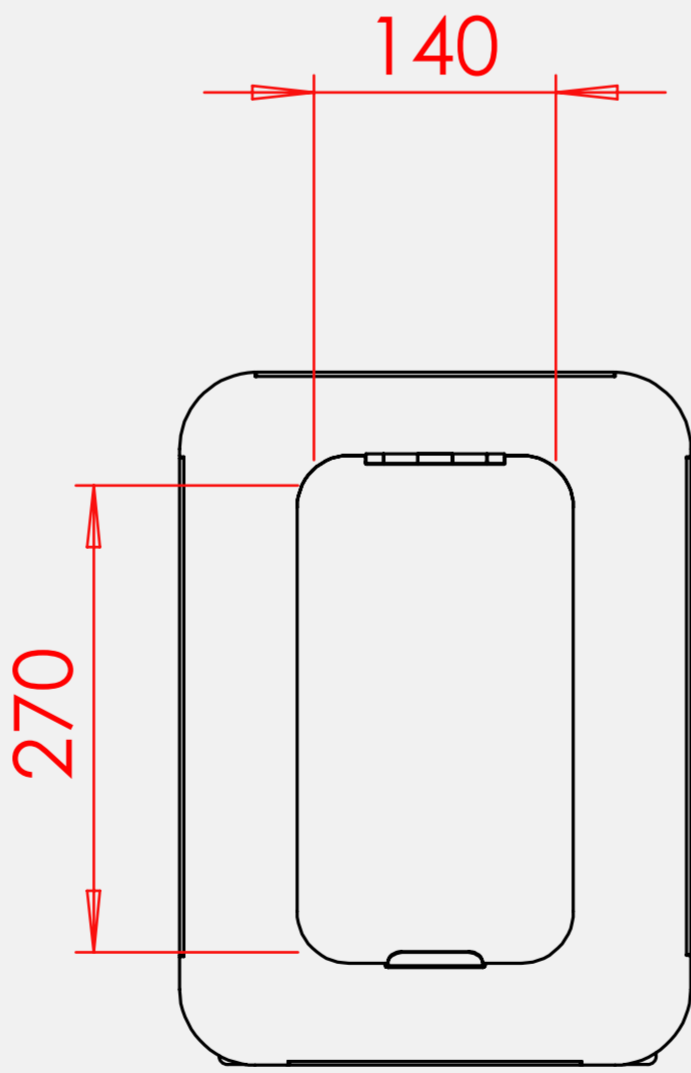

Used for
All types of waste items.

X Slot Aperture

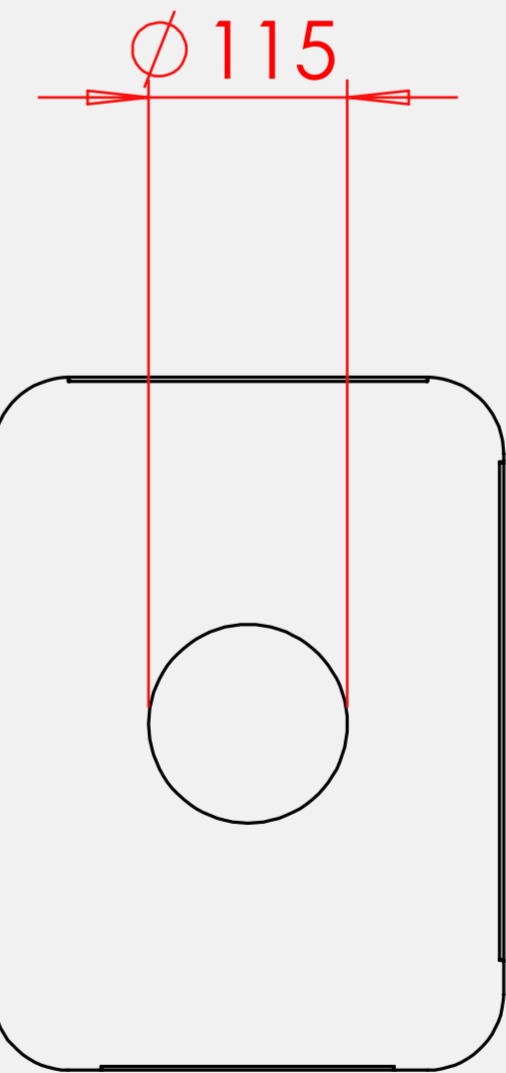

Used for
Paper & Confidential Paper.

Lift-up Lid

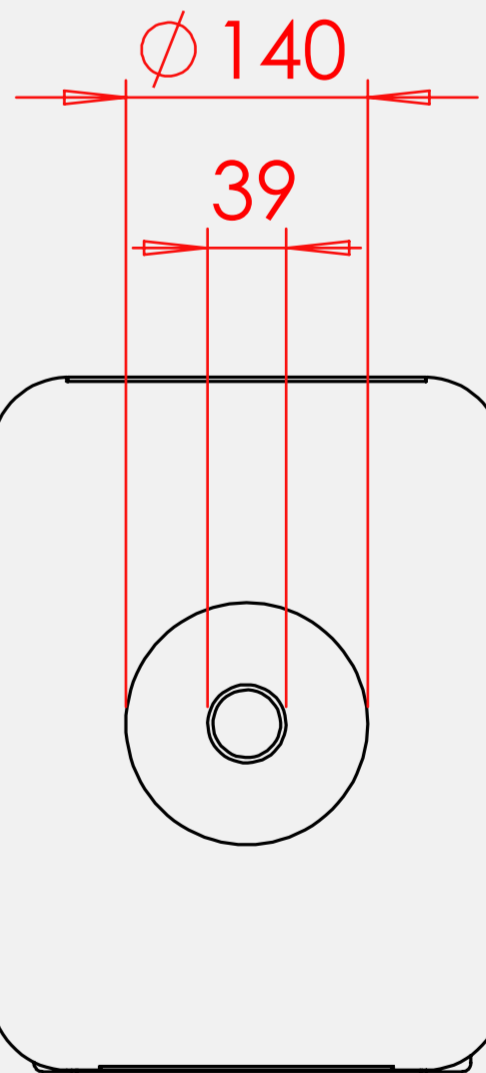

Used for
All types of waste items, most commonly used for Food Waste.

Round Aperture

Used for
Drink bottles (500ml), Cans & Tins.

Liquid Funnel

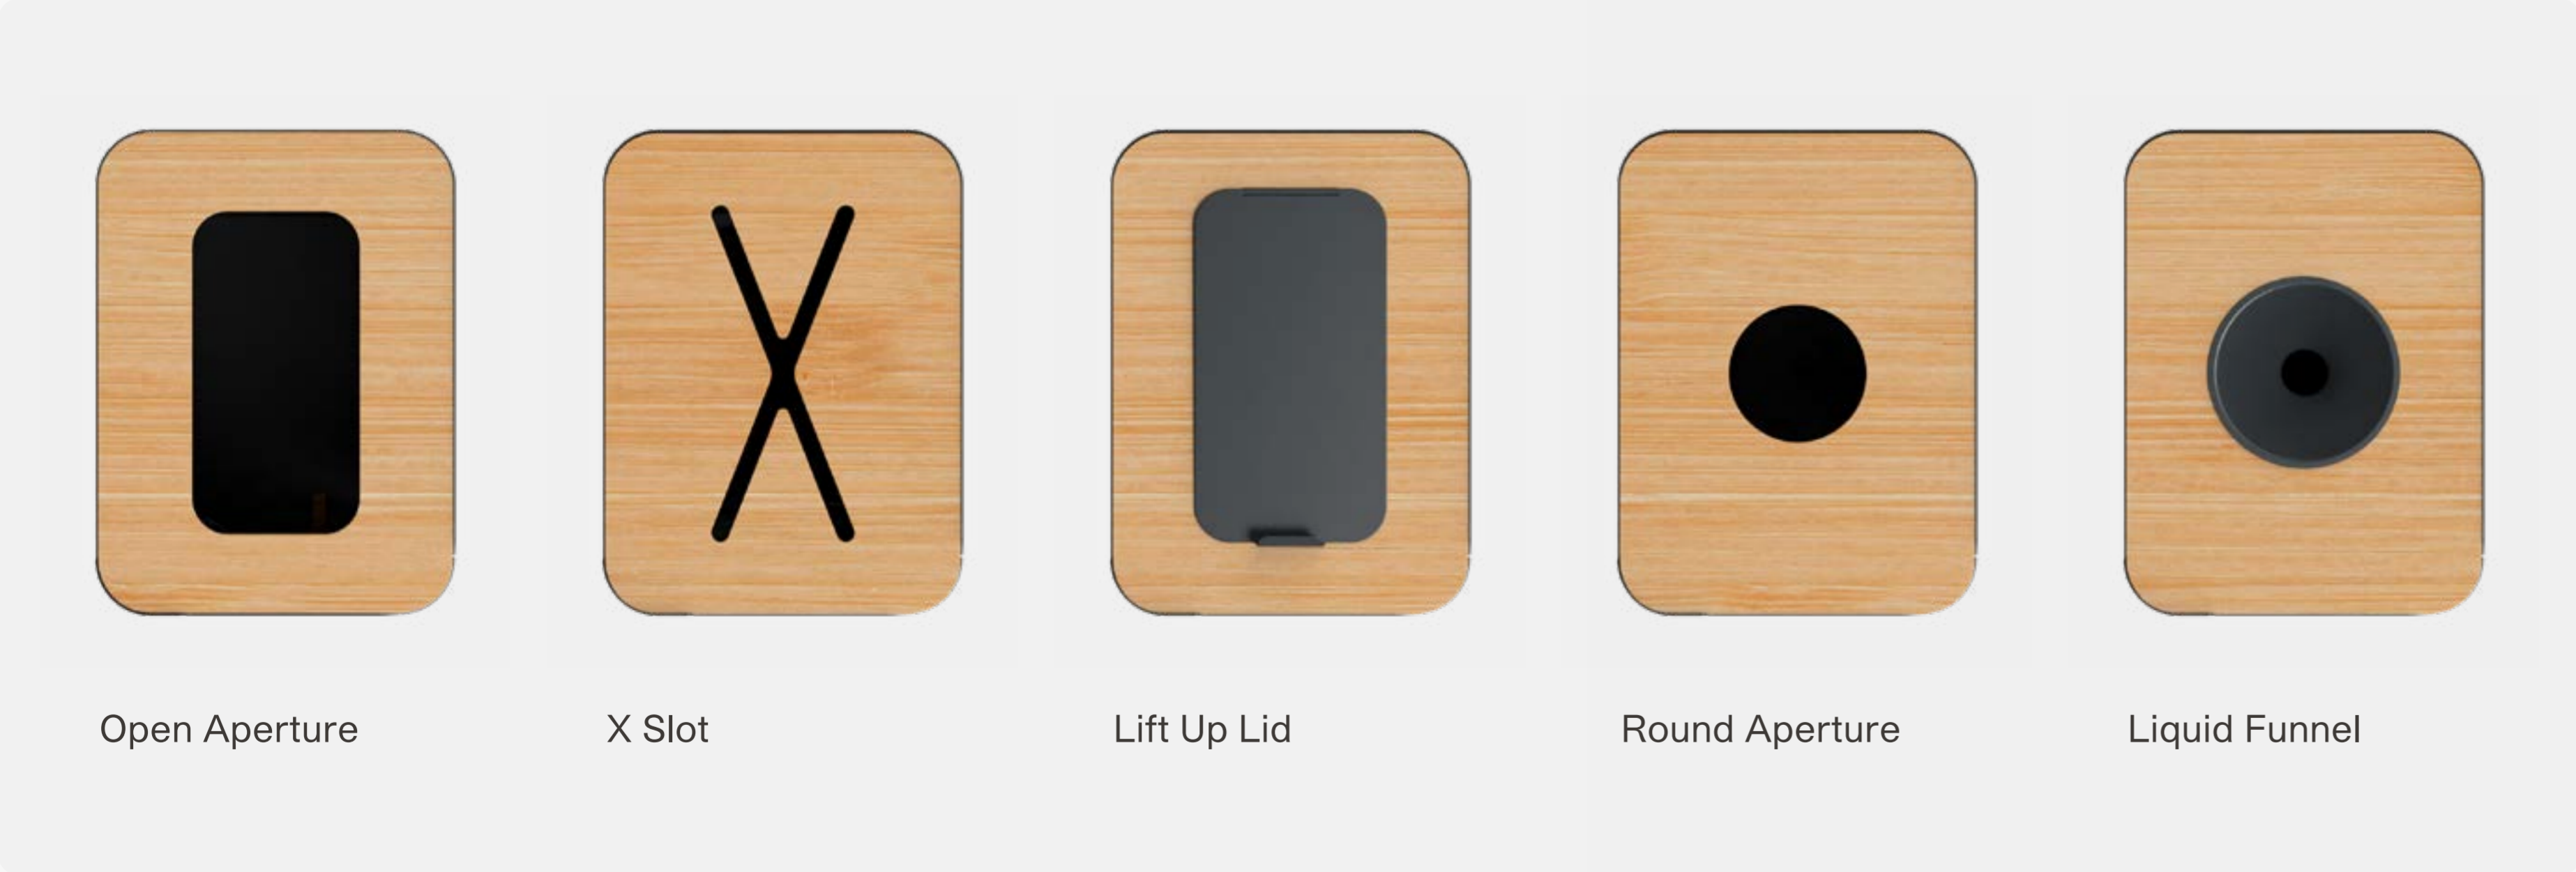

Used for
All types of liquid collection.

Sustainable Bamboo Worktops

Elevate your space with a worktop crafted from fast-growing bamboo, combining durability and sustainability.

Lacquered Bamboo

- 12mm thickness.
- Growing bamboo uses 1/3 of the water consumption than growing oak.
- Bamboo is one of the fastest growing land plants in the world.
- Bamboo fiber is 2 to 3 times stronger than timber.
- Virtually, every part of the bamboo plant can be used with very low waste from product waste.
- Bamboo releases 35% more oxygen than hardwood forests.
- Bamboo is naturally anti-bacterial, anti-fungal and easy to clean.

Standard bags that are 1/3 full wastes plastic & creates unnecessary CO₂

By design, standard bags are wasteful due to overhang on the bins and scheduled emptying regardless of the fill level.

Unisort® Liner System

reduces plastic usage and CO₂ attributed to waste bags by 80%

Only cut the bag length required to hold the waste disposed of, instead of removing a whole bag.

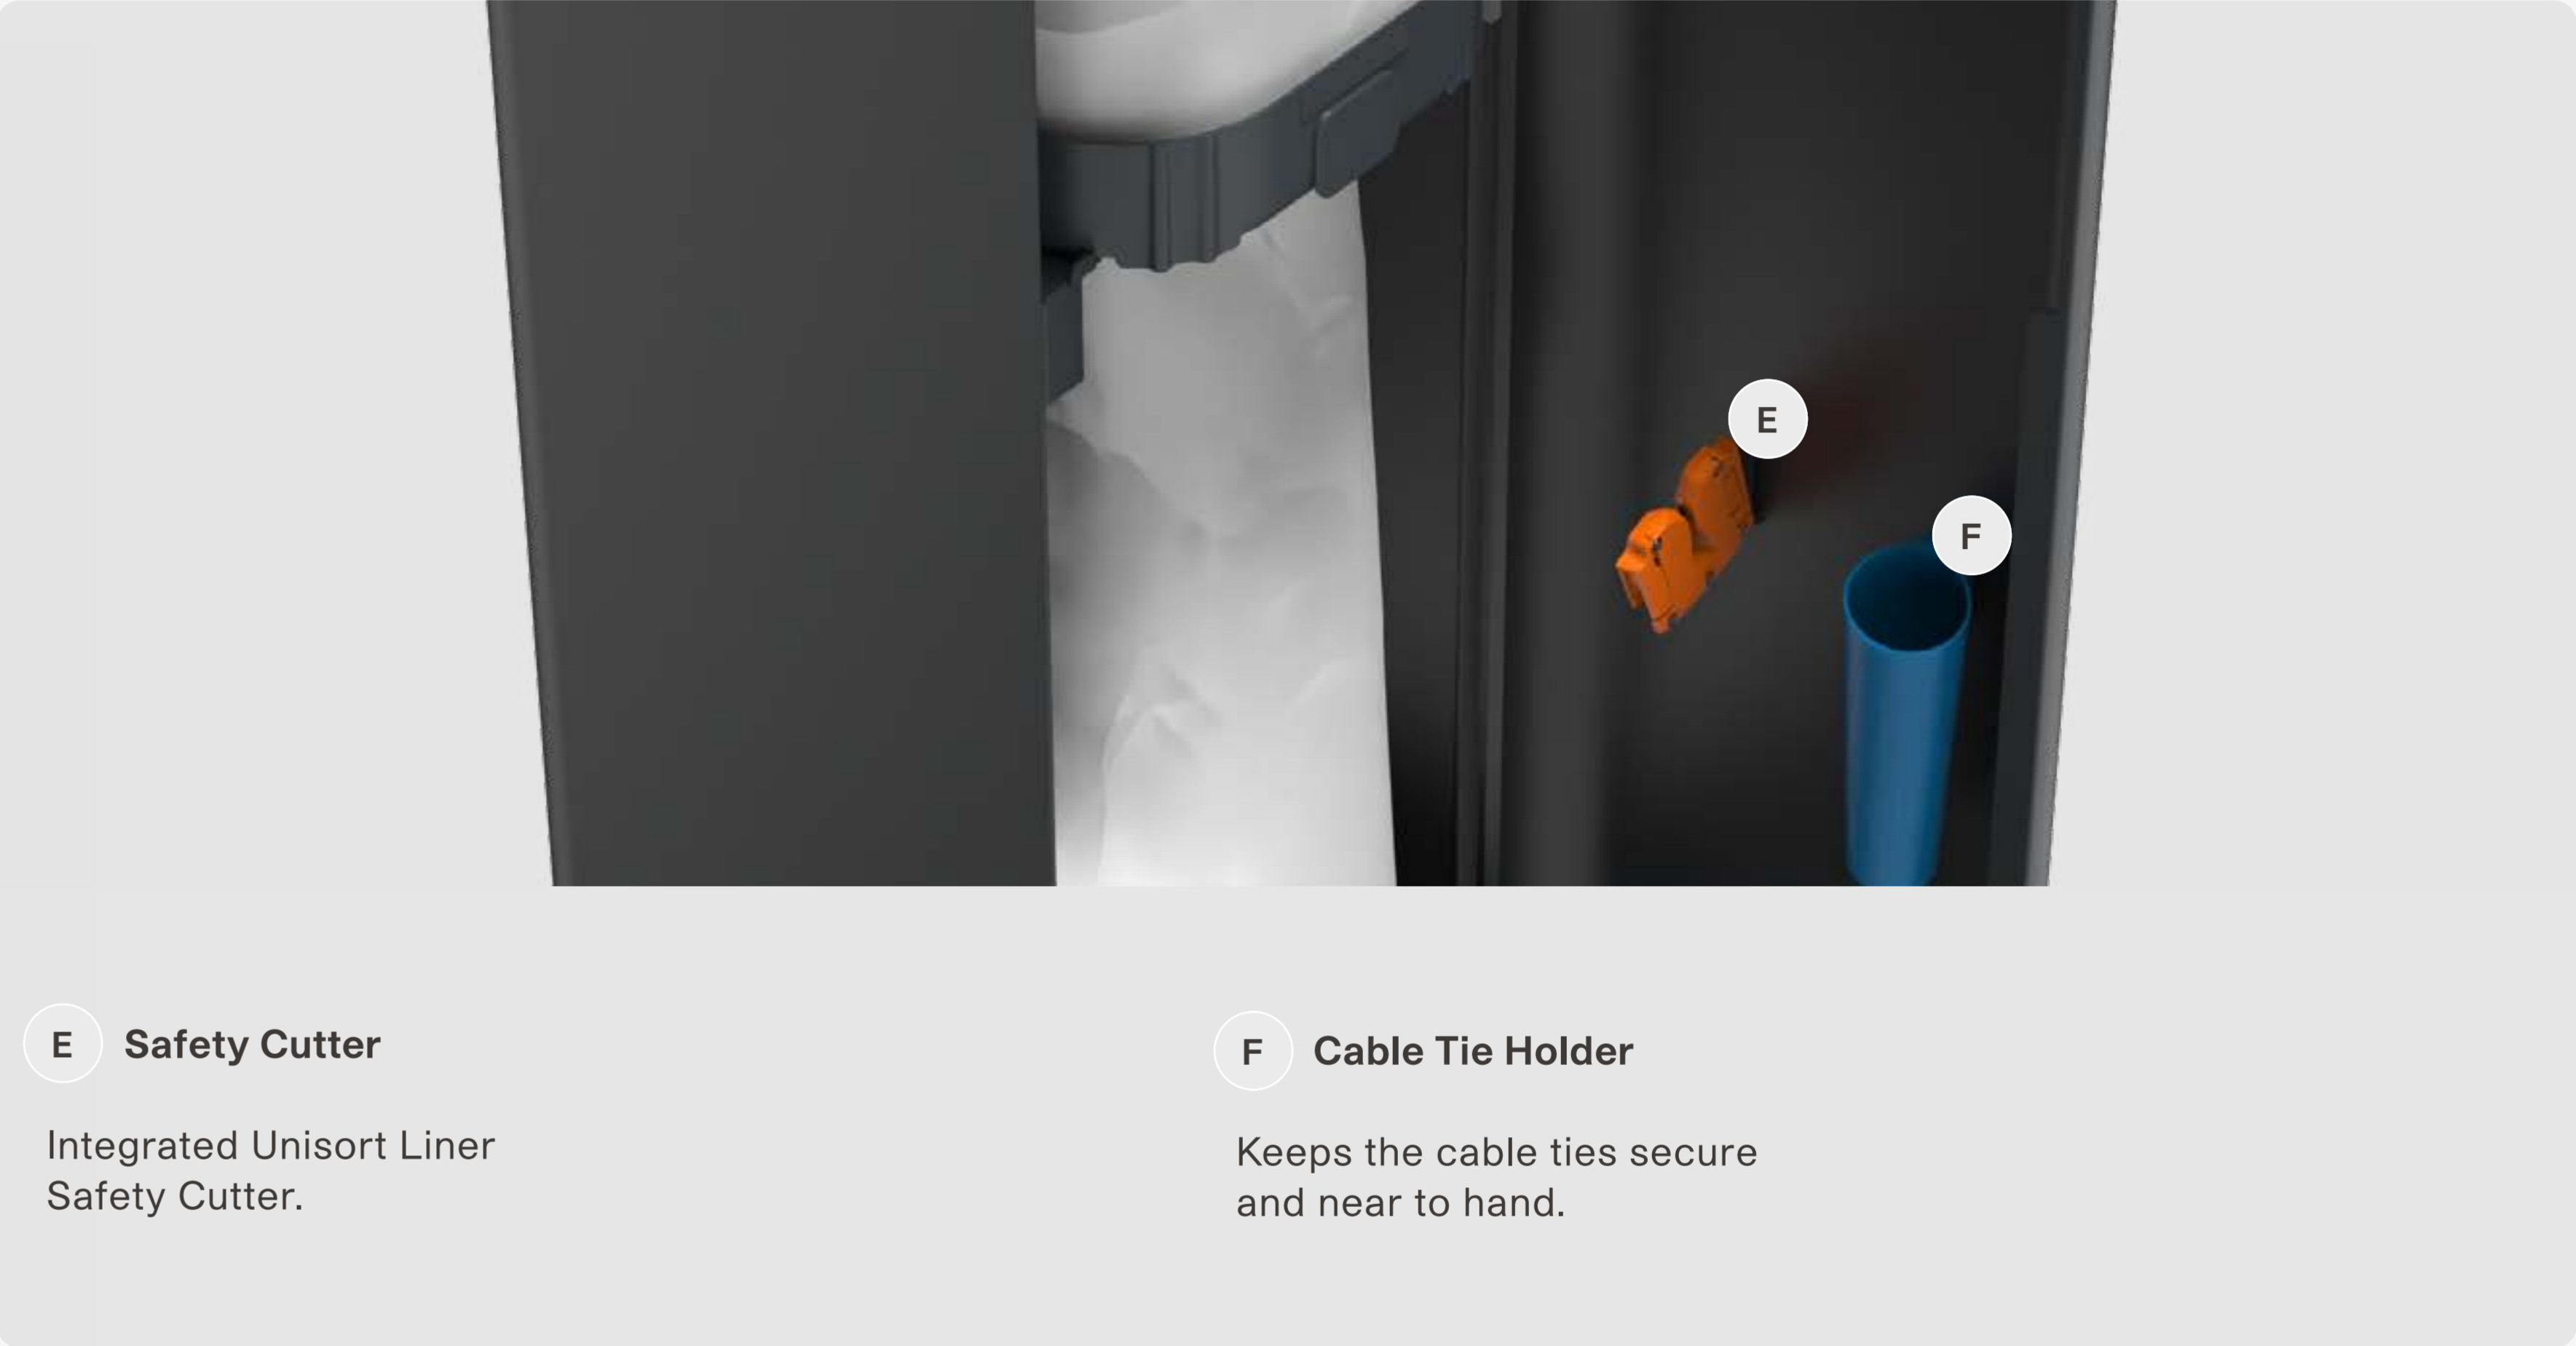

A cleaner, quicker and greener way to reduce CO₂.

Standard

Unisort Liner System

Liner System Accessories

E Safety Cutter

Integrated Unisort Liner Safety Cutter.

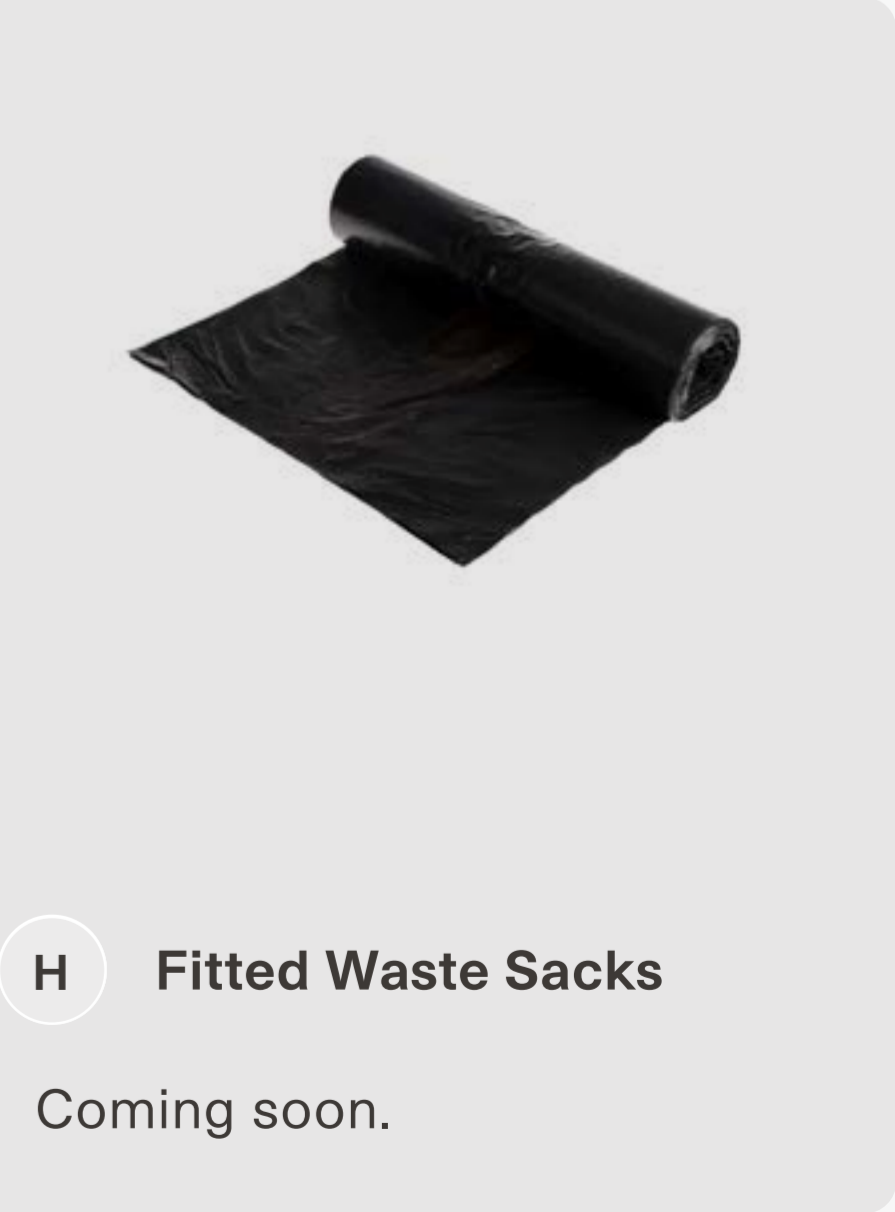

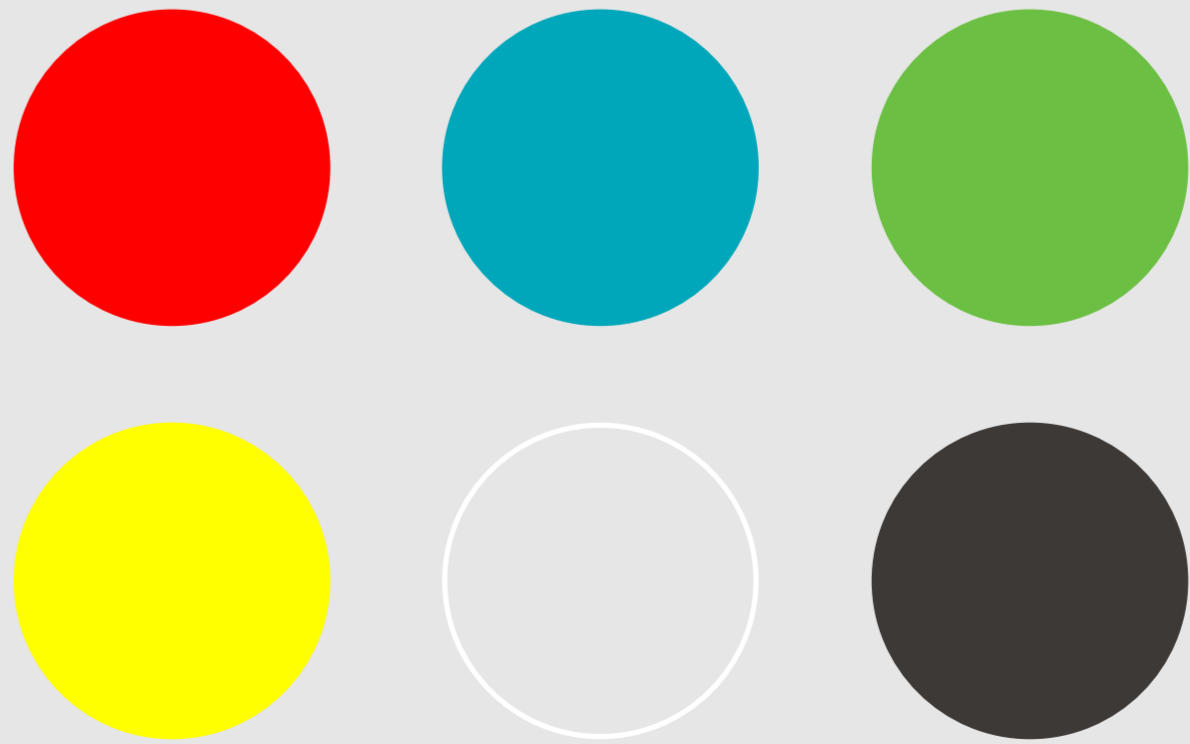

F Cable Tie Holder

Keeps the cable ties secure and near to hand.

G Unisort Liner System

Mini 60m liner refill. Typically equivalent to 150-250 standard waste bags.

- Red **LS8030R**
- Blue **LS8030B**
- Green **LS8030G**
- Yellow **LS8030Y**
- Transparent **LS8030TR**
- Black **LS8030BL**
