

Unisort iQ

Smart Waste Bag Tracking

Drive Behavioural Change,
Decrease Contamination,
Increase Compliance
and Recycling

Coming April 2026

The Challenge

Most organisations have recycling & sustainability goals but struggle with:

- Poor recycling behaviour
- High recycling contamination rates
- Inconsistent data from waste contractors
- No visibility across buildings/floors
- Difficulty proving recycling & CO₂ performance
- Difficulty tracking the source of contamination
- Hitting a "glass ceiling" with recycling rates

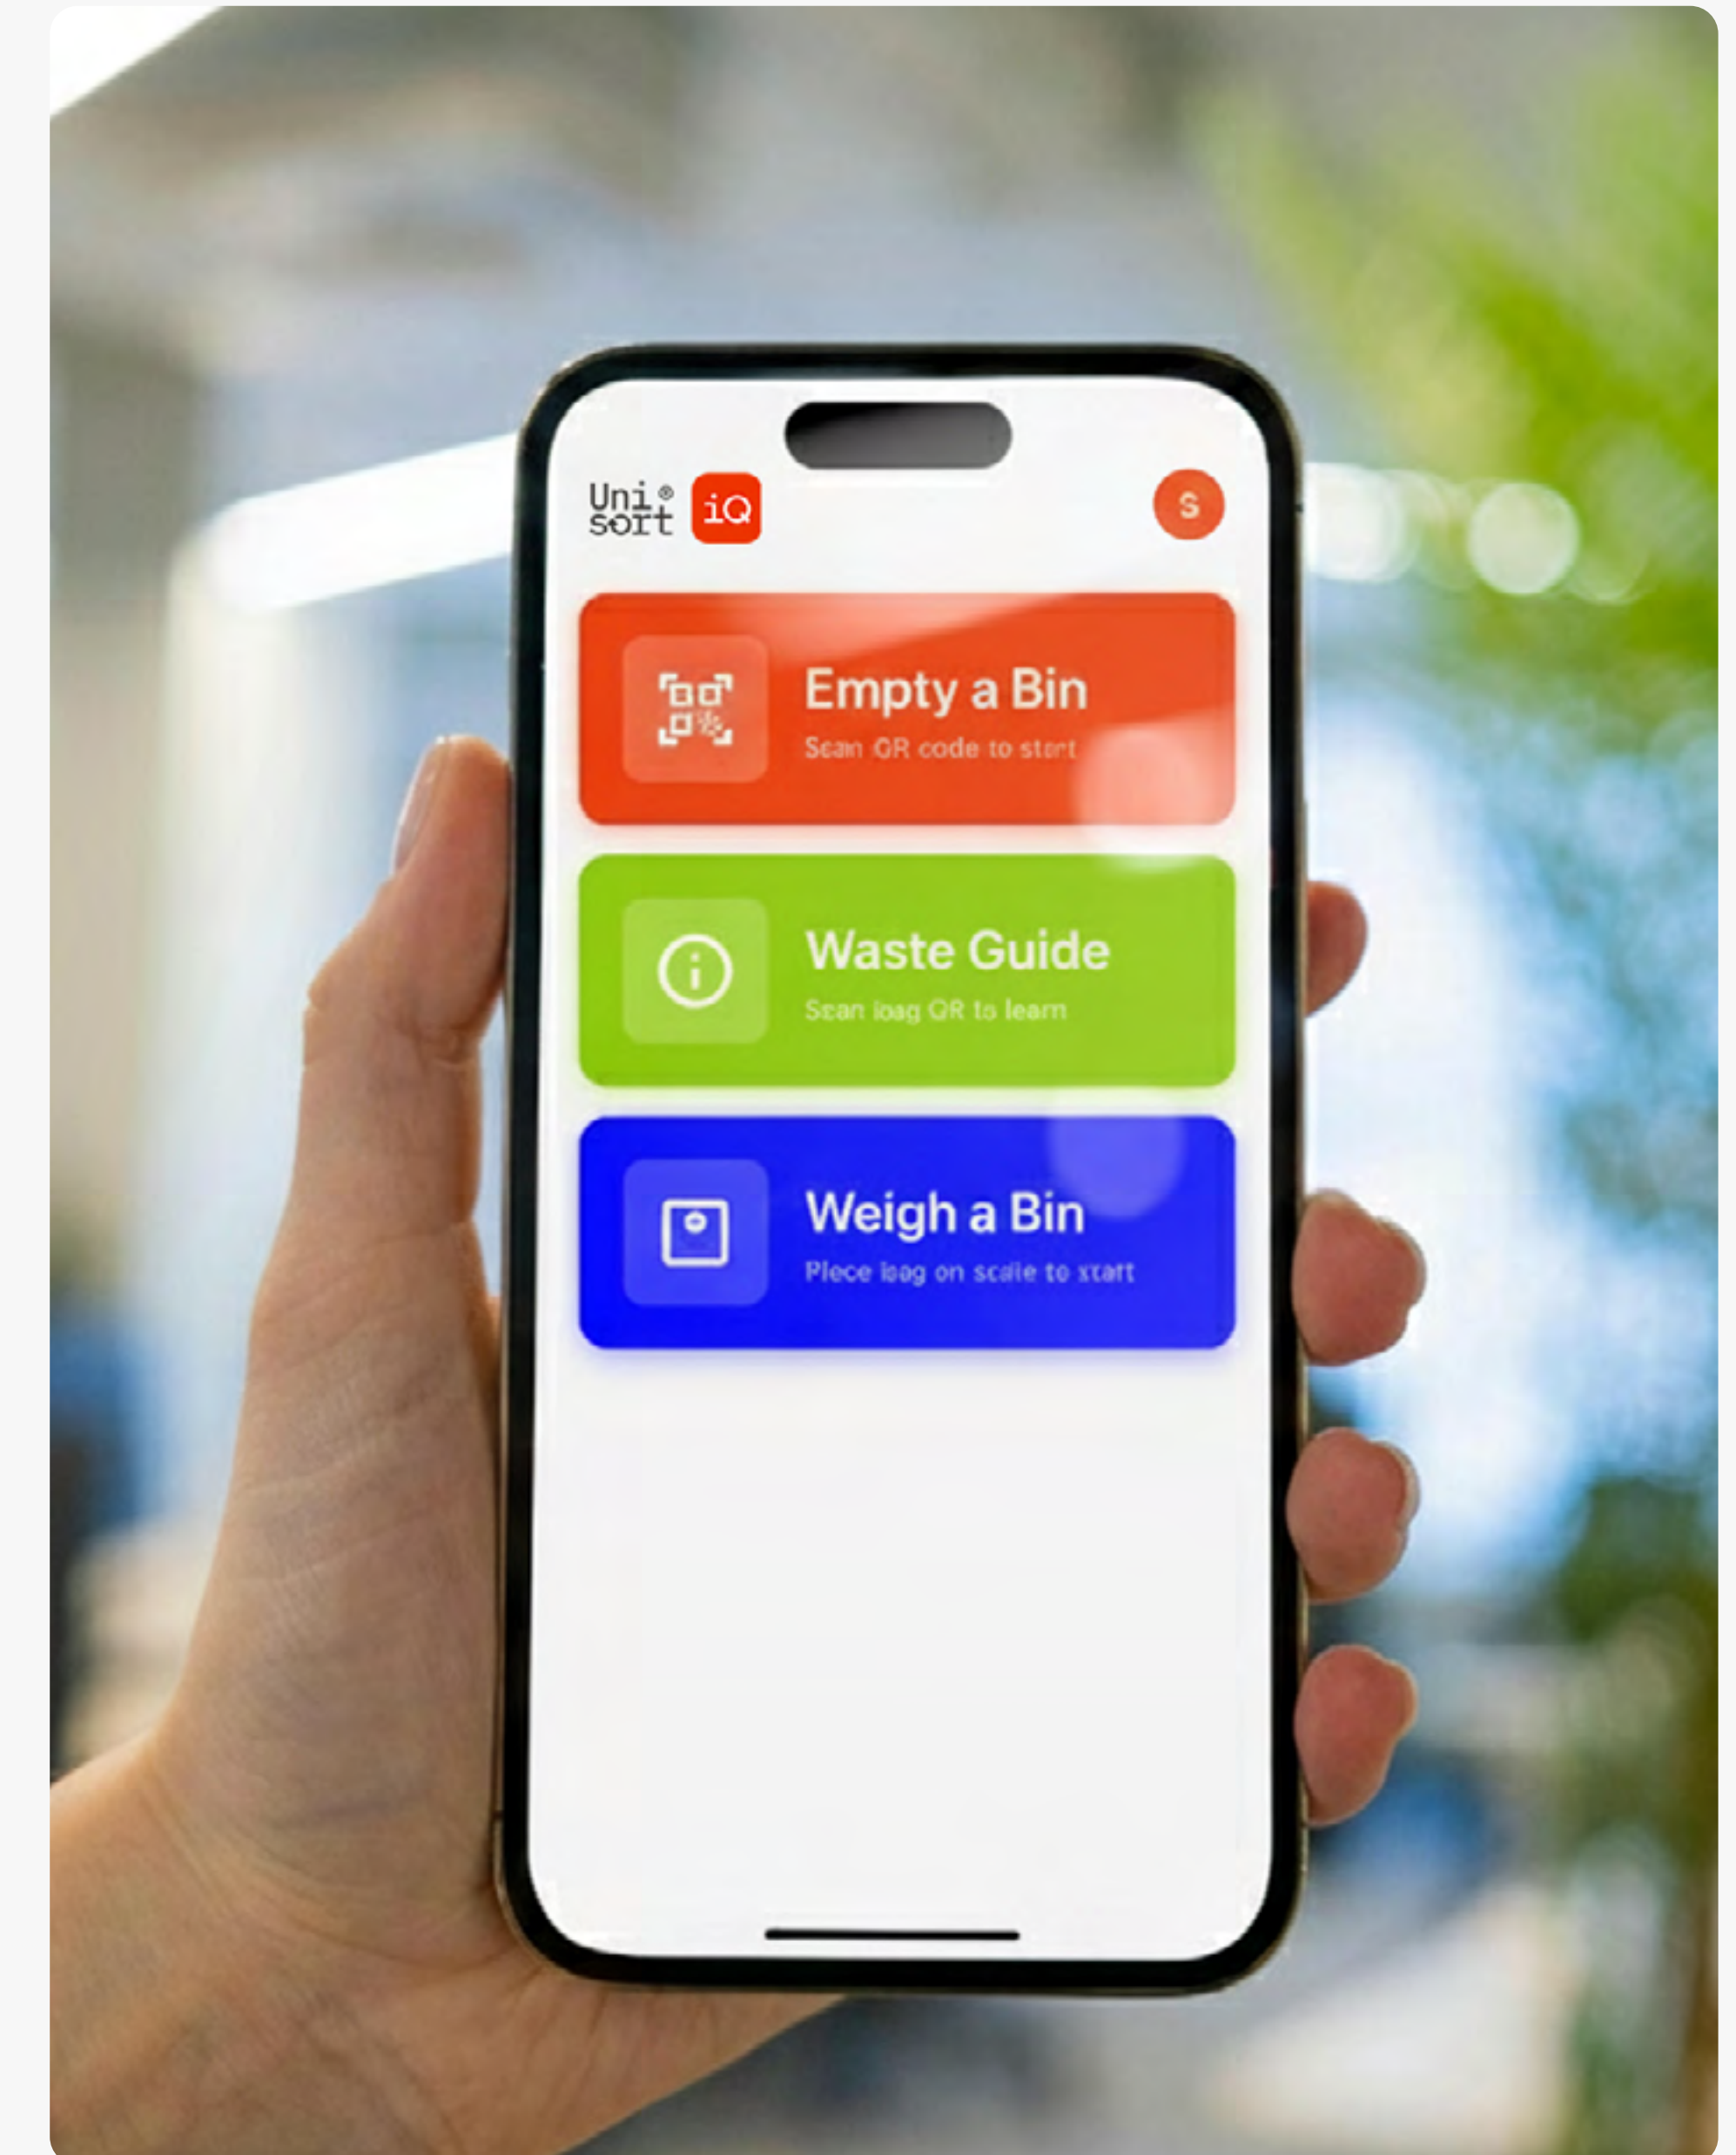

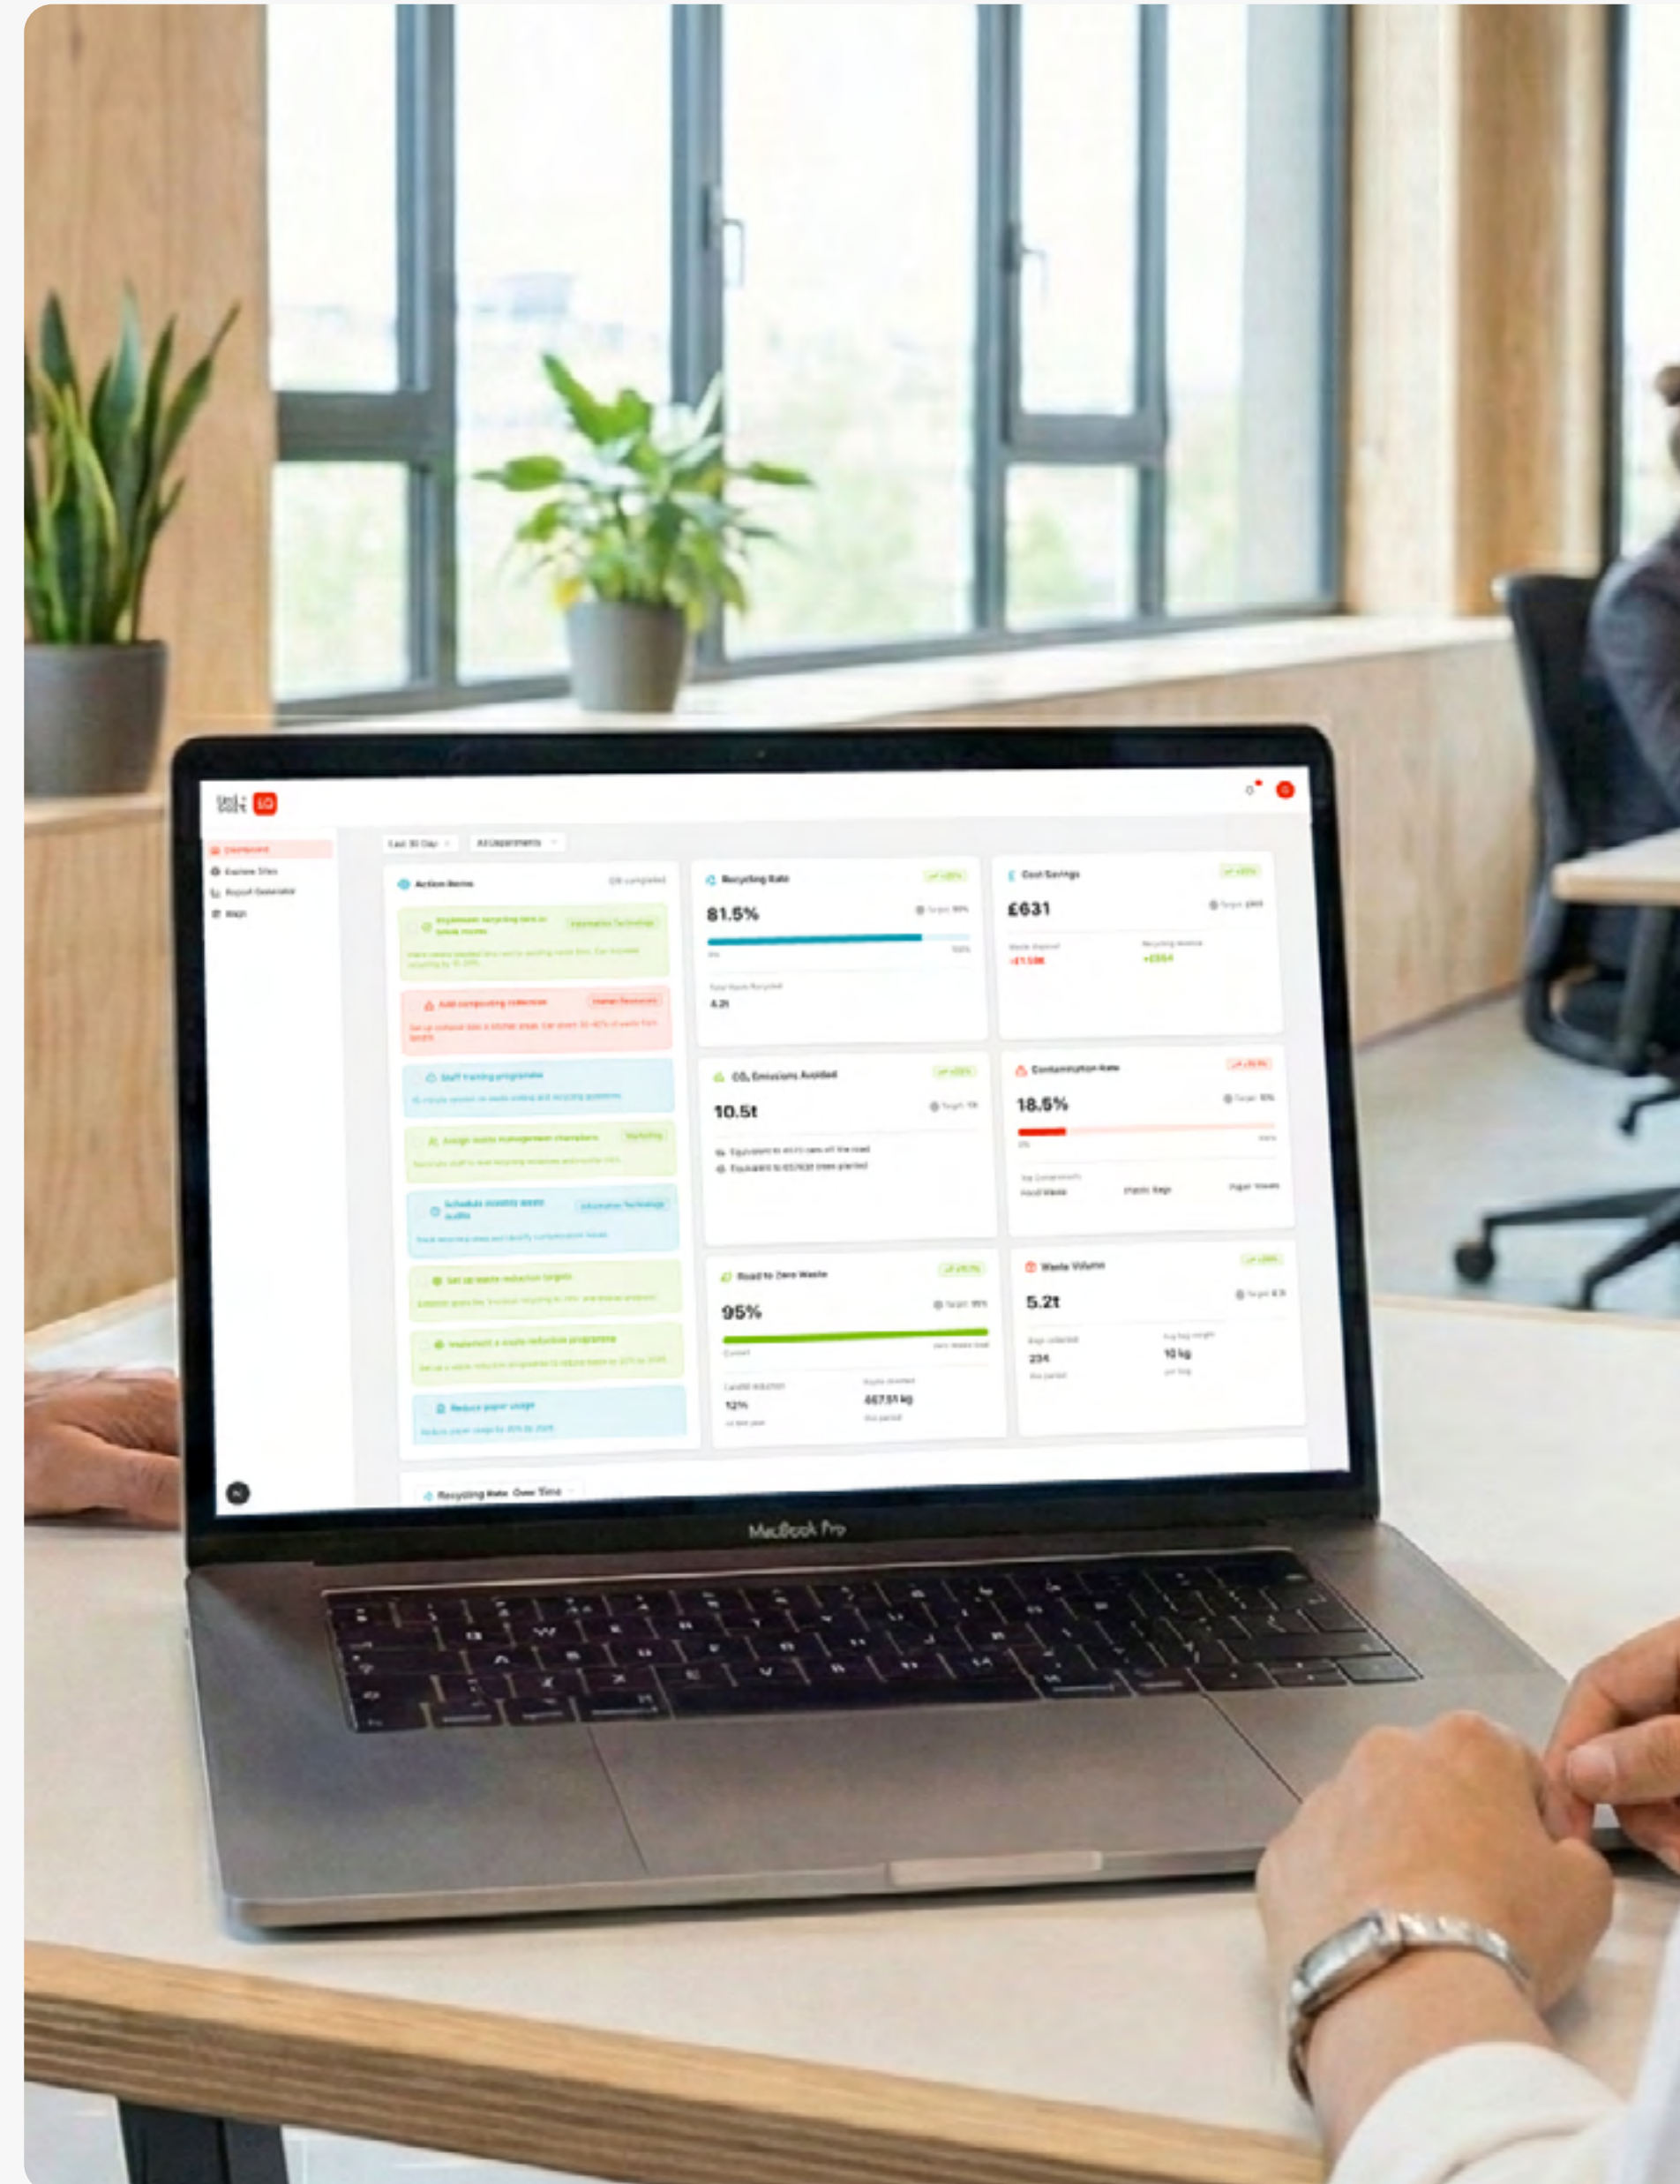

Our Solution

A mobile app combined with an online dashboard that tracks waste from disposal to collection, educates staff in real time, and gives facilities managers clear, trustworthy performance insights.

A recycling education and waste tracking solution that:

- Drives behavioural change
- Ensures compliance with legislation
- Boosts recycling rates
- Reduces contamination & collection costs

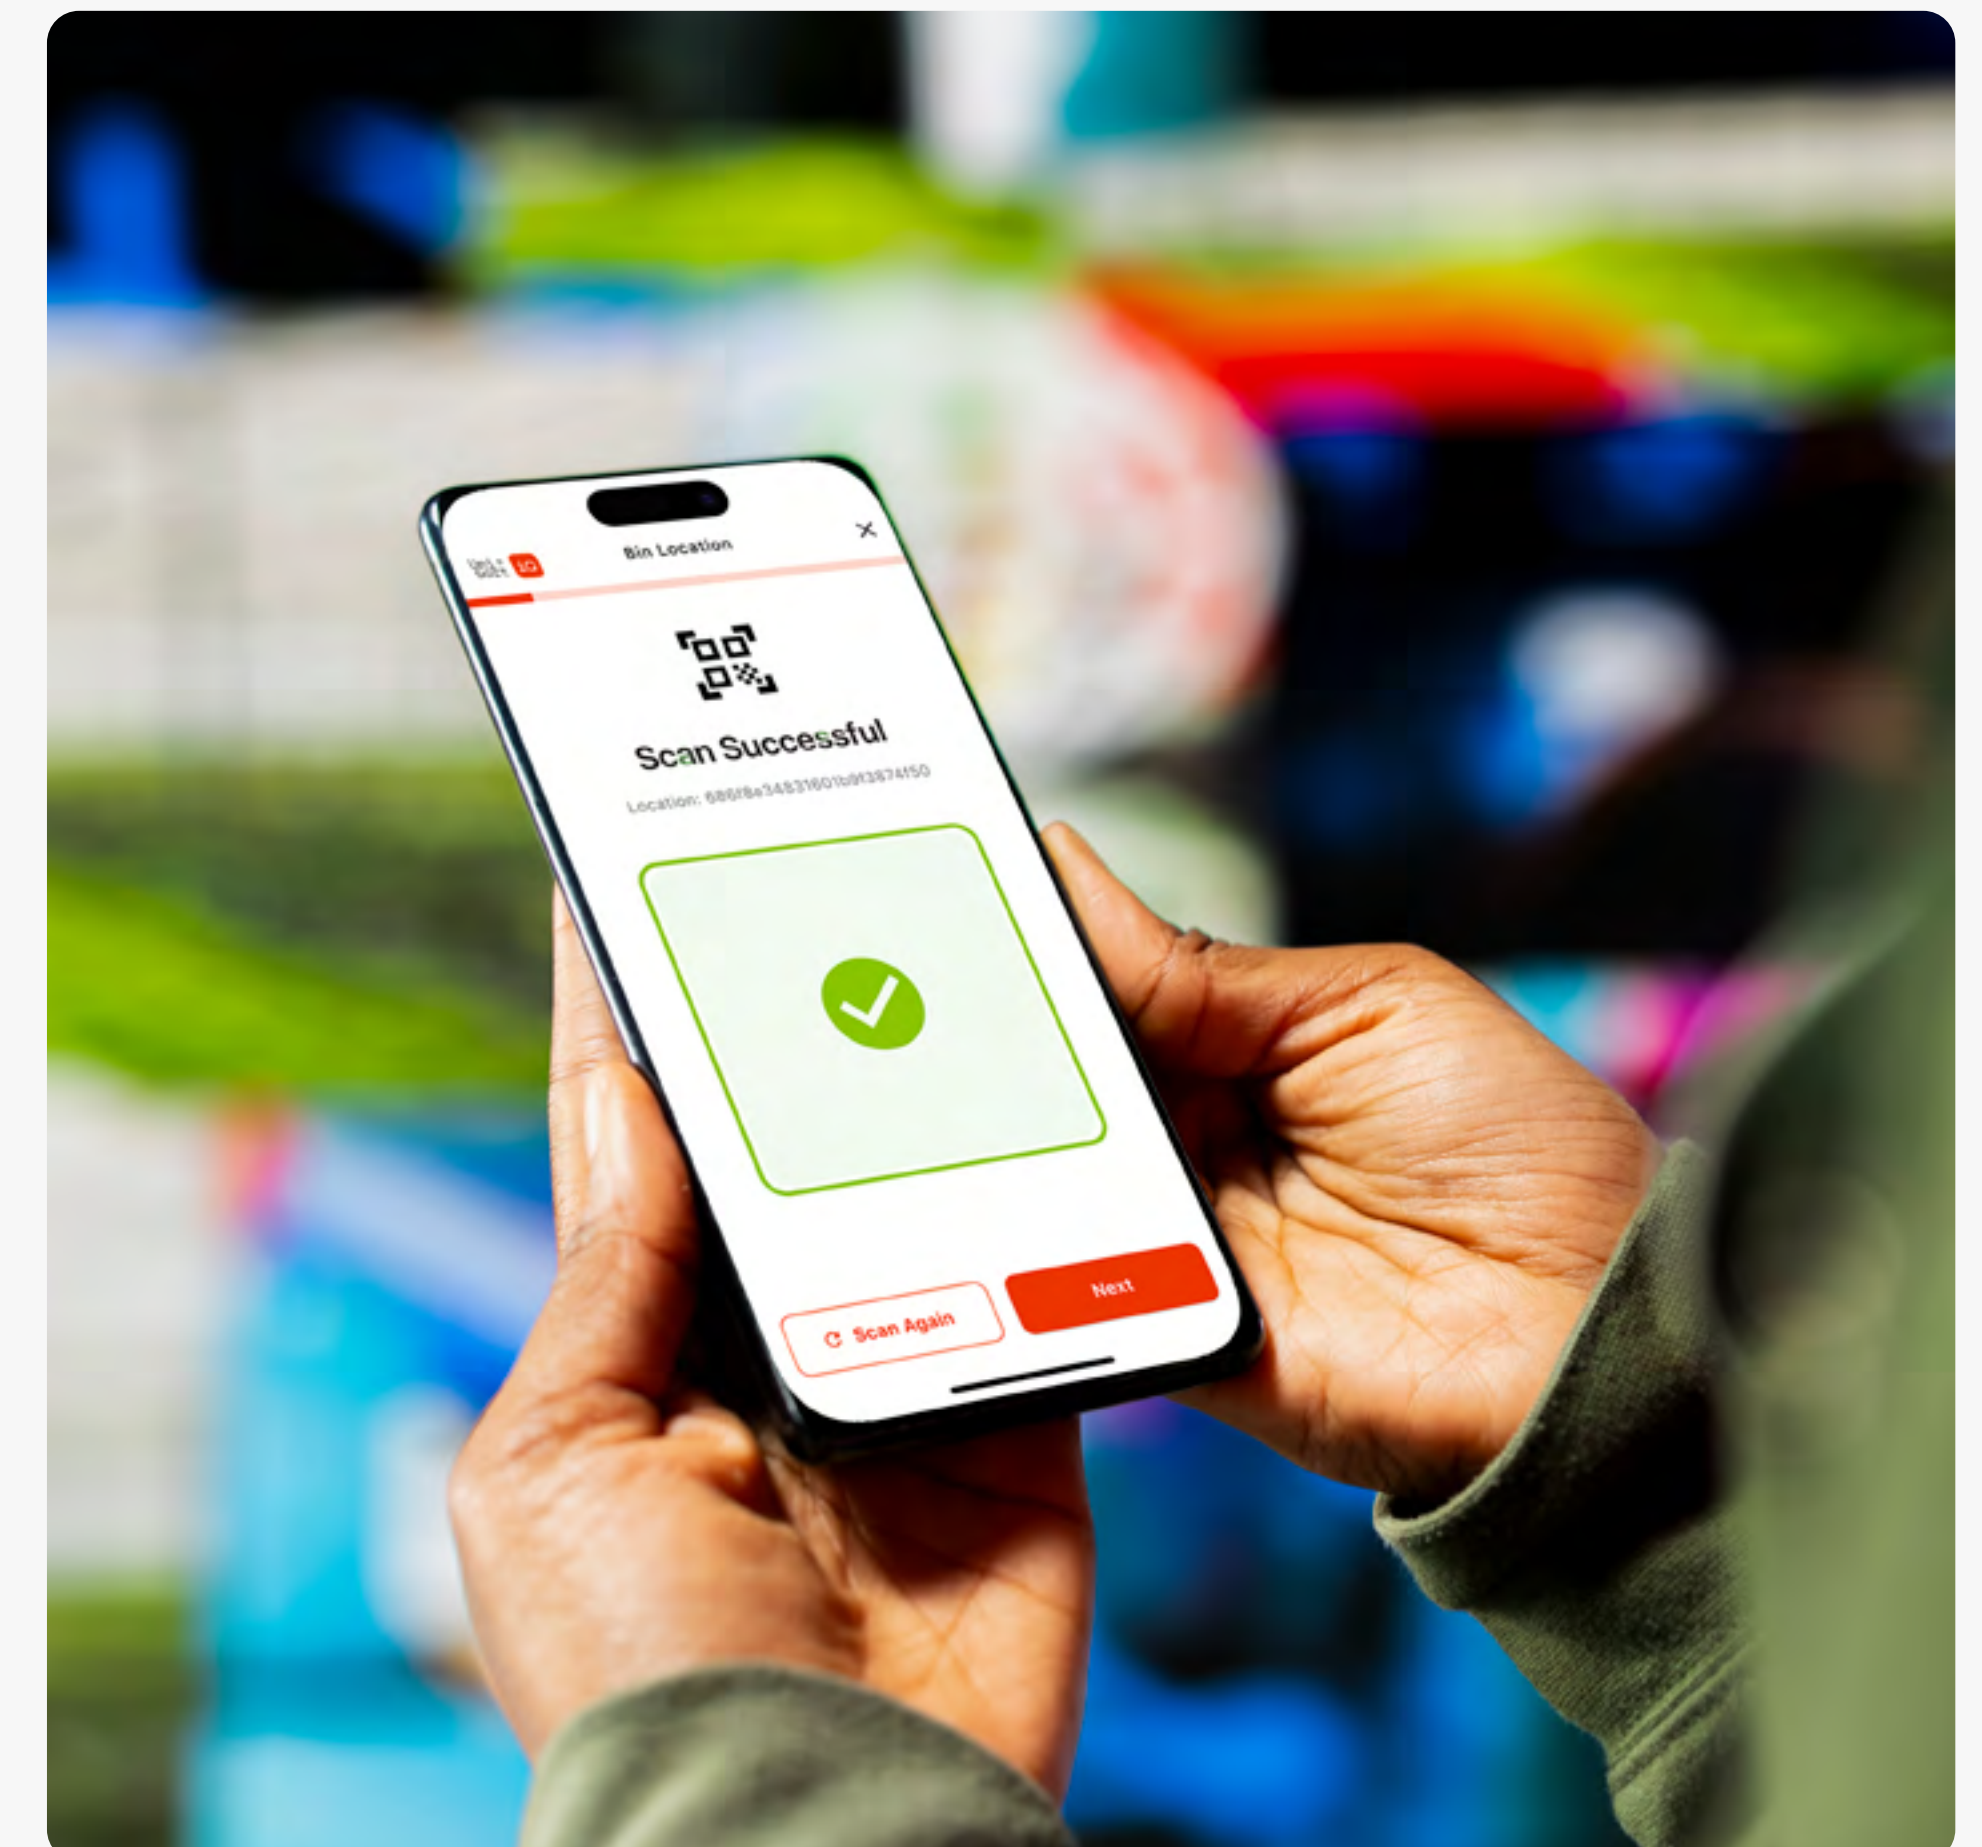

Why Choose Unisort iQ?

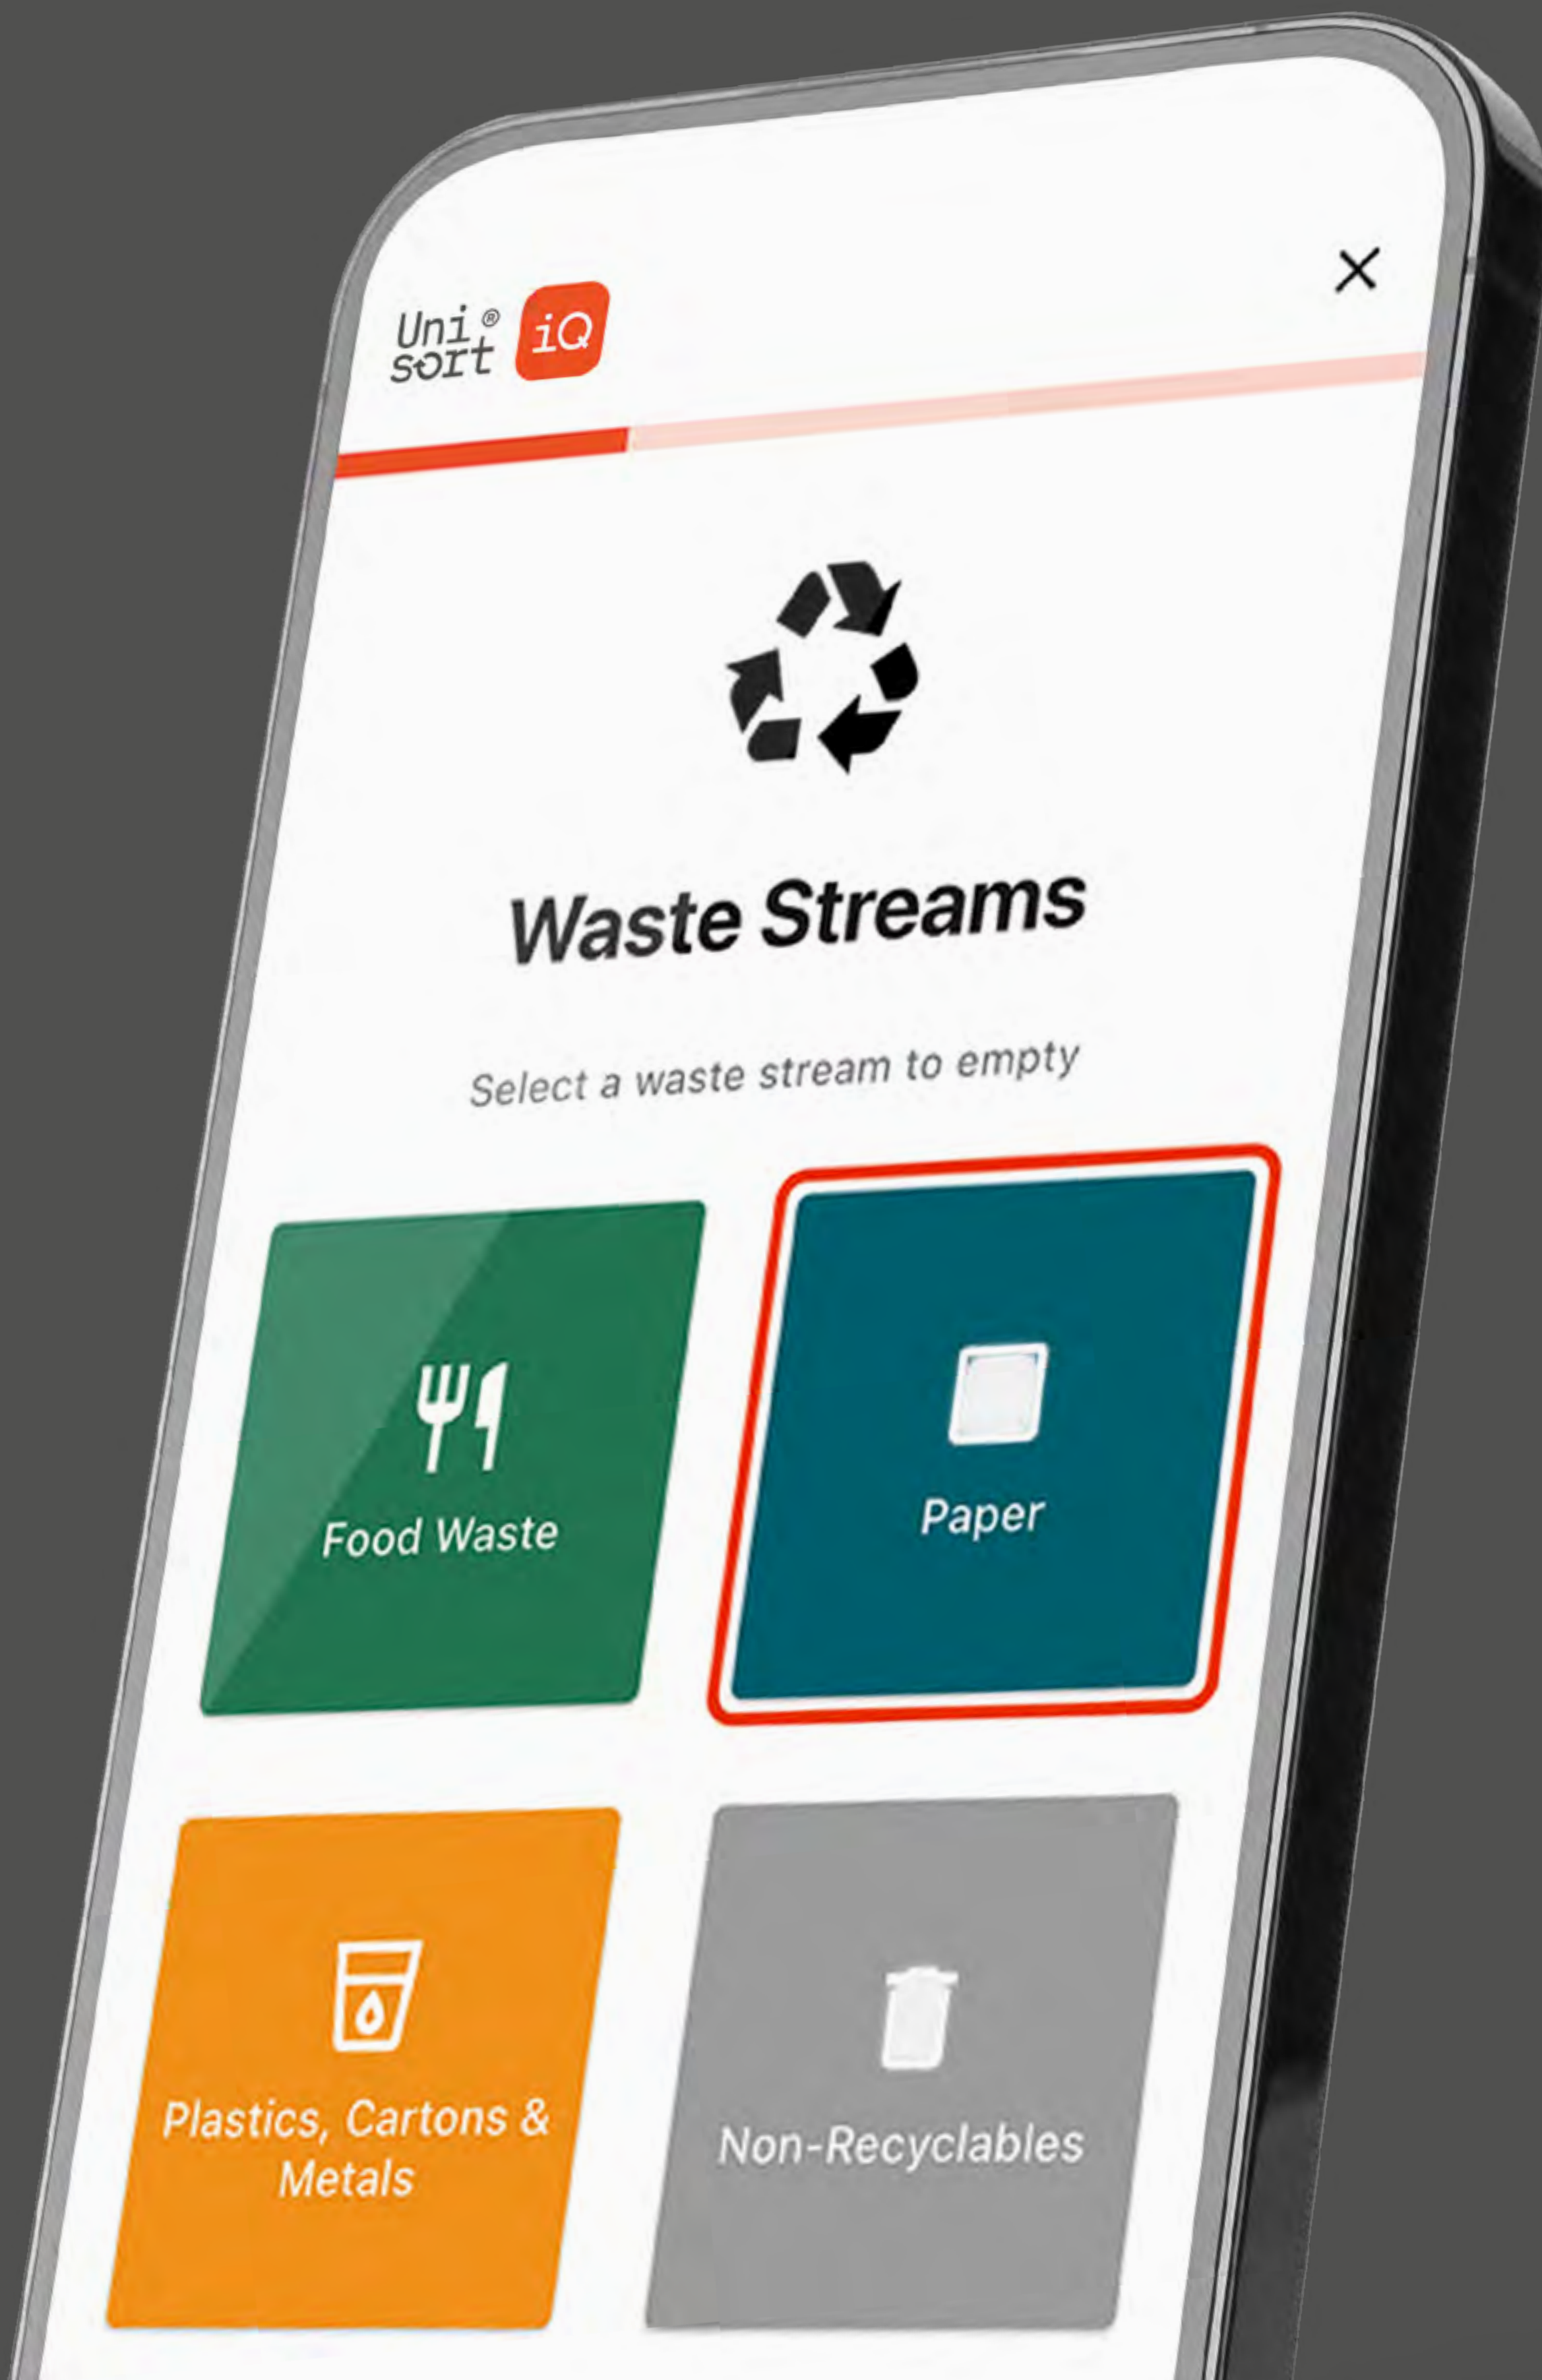

- Built to work for the cleaner and the facilities manager
- Fast to deploy, easy to use
- Designed for multi-site estates & multi-level buildings

Who It's For

- Facilities, Waste & Sustainability Managers
- Corporate Offices & Multi-Tenant Buildings
- Universities & Colleges
- Restaurants & Hospitality Venues
- Industrial Manufacturing Sites
- Facilities Management Companies
- Waste Collection Companies

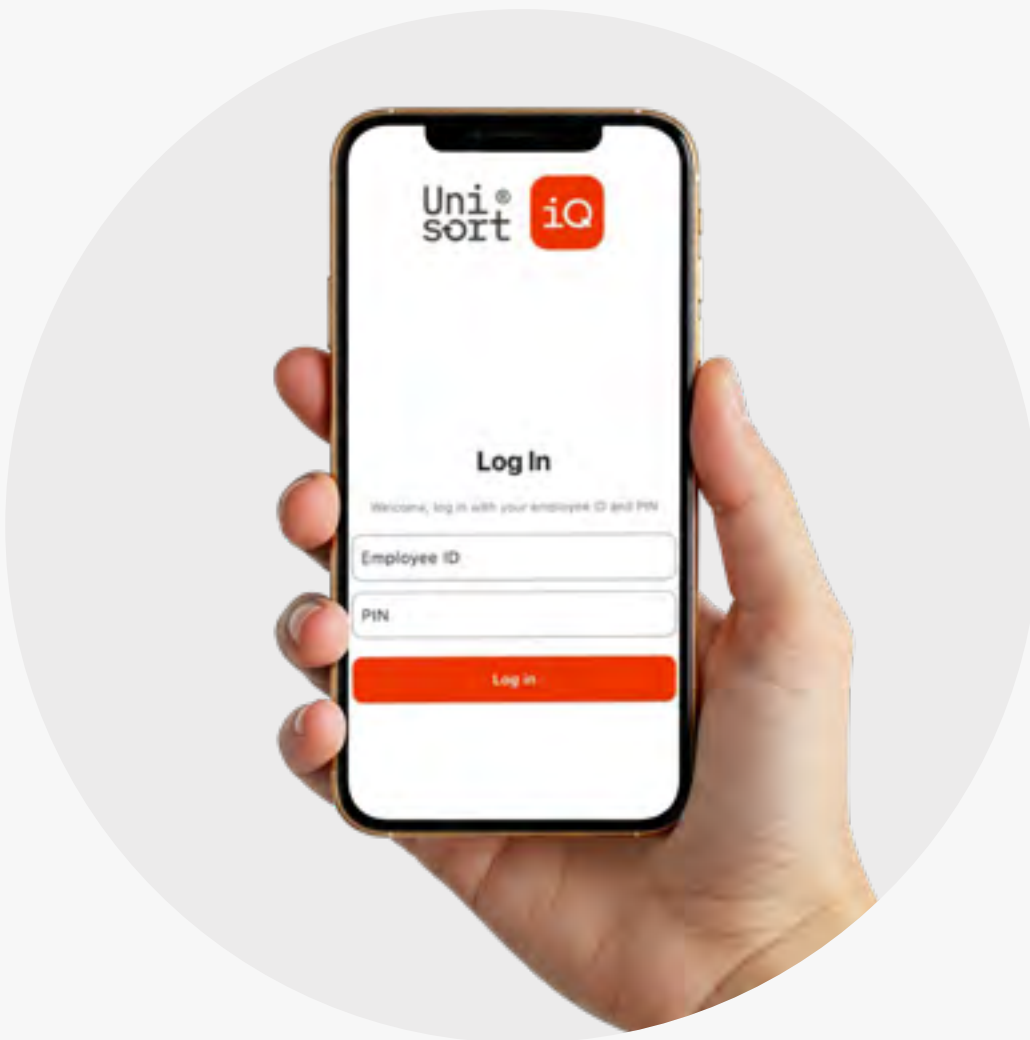

Key Features

-  QR-coded recycling stations & waste bags
-  Real-time recycling + contamination dashboards
-  Cleaner accountability (individual logins)
-  Waste weighing scale integration
-  Multi-site, multi-floor reporting
-  AI insights and recommendation (*coming soon*)

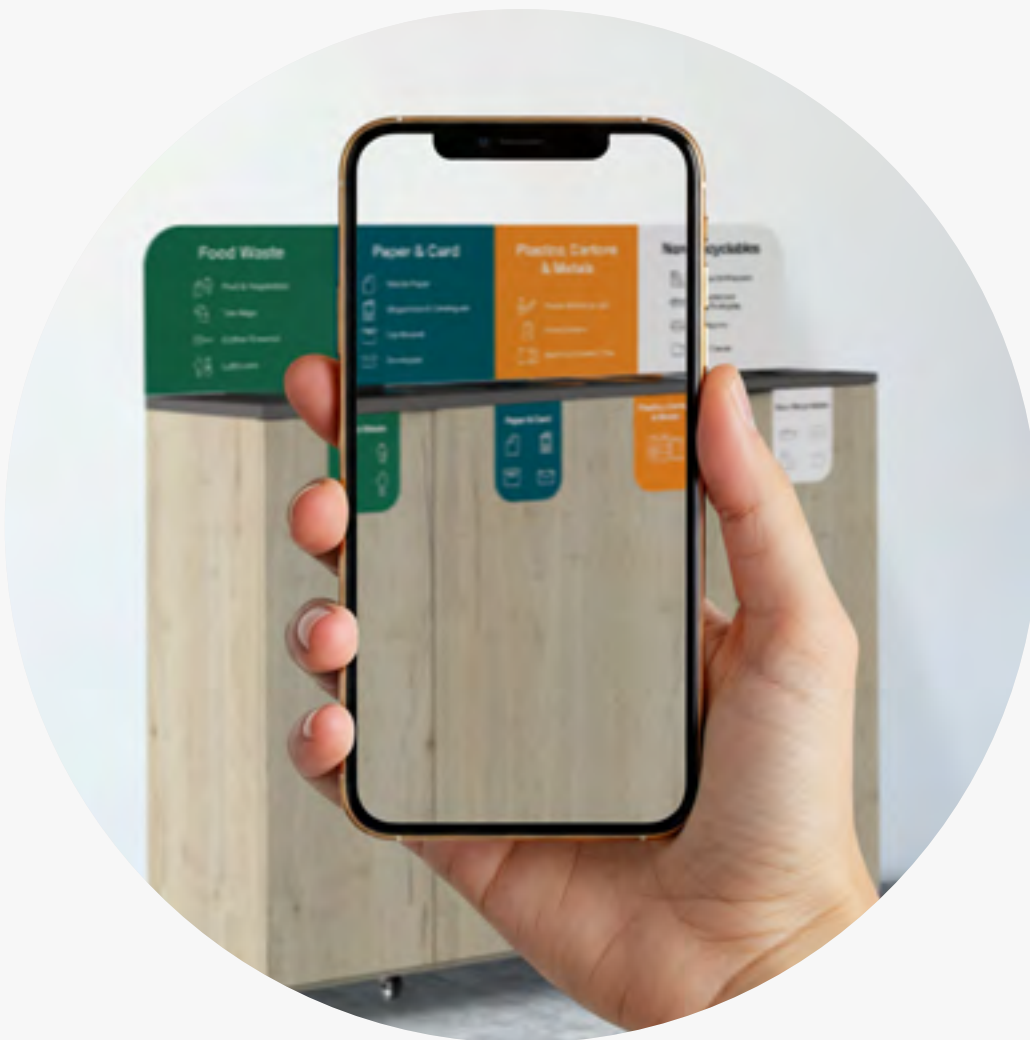

Effortless Data Capture

How the solution works

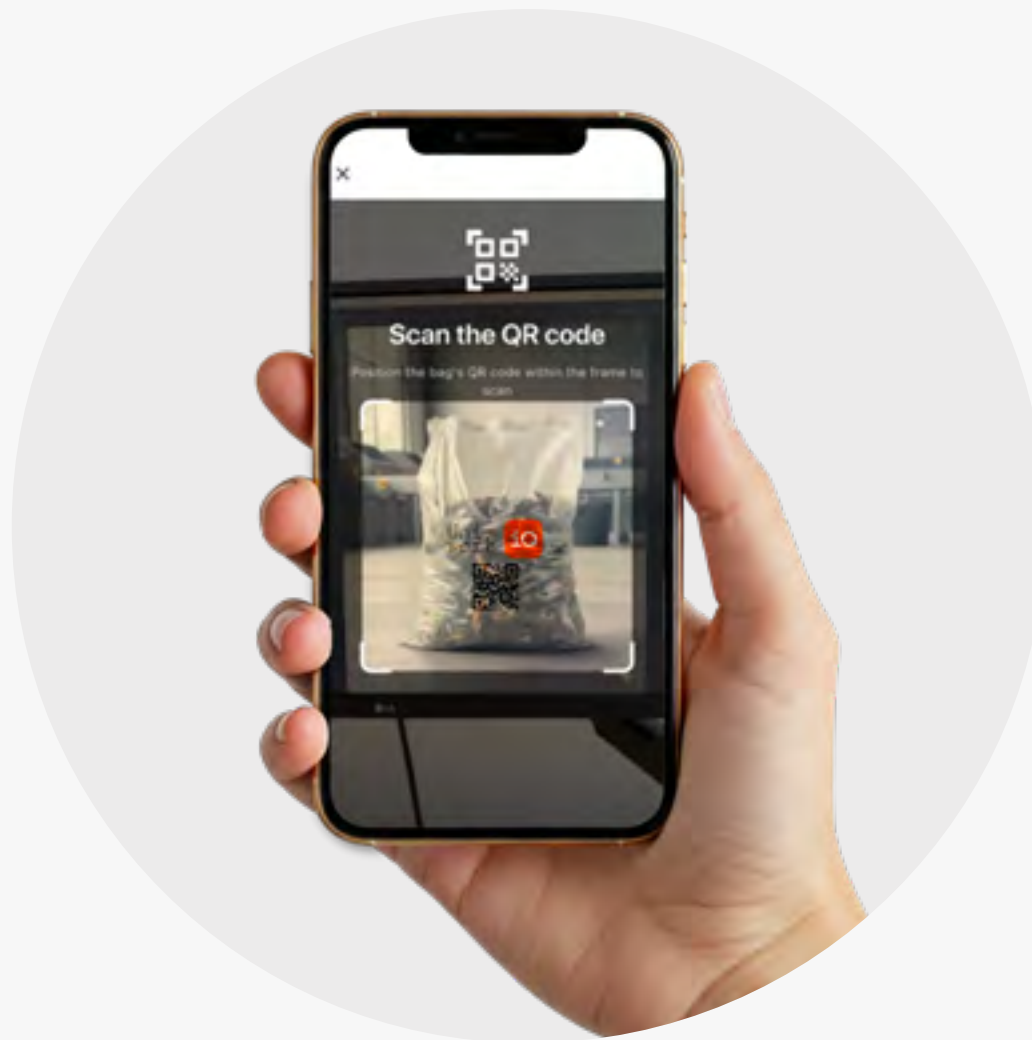

1. Get the App

Cleaners download the app onto their smartphone or PDA & log in using their ID and PIN.

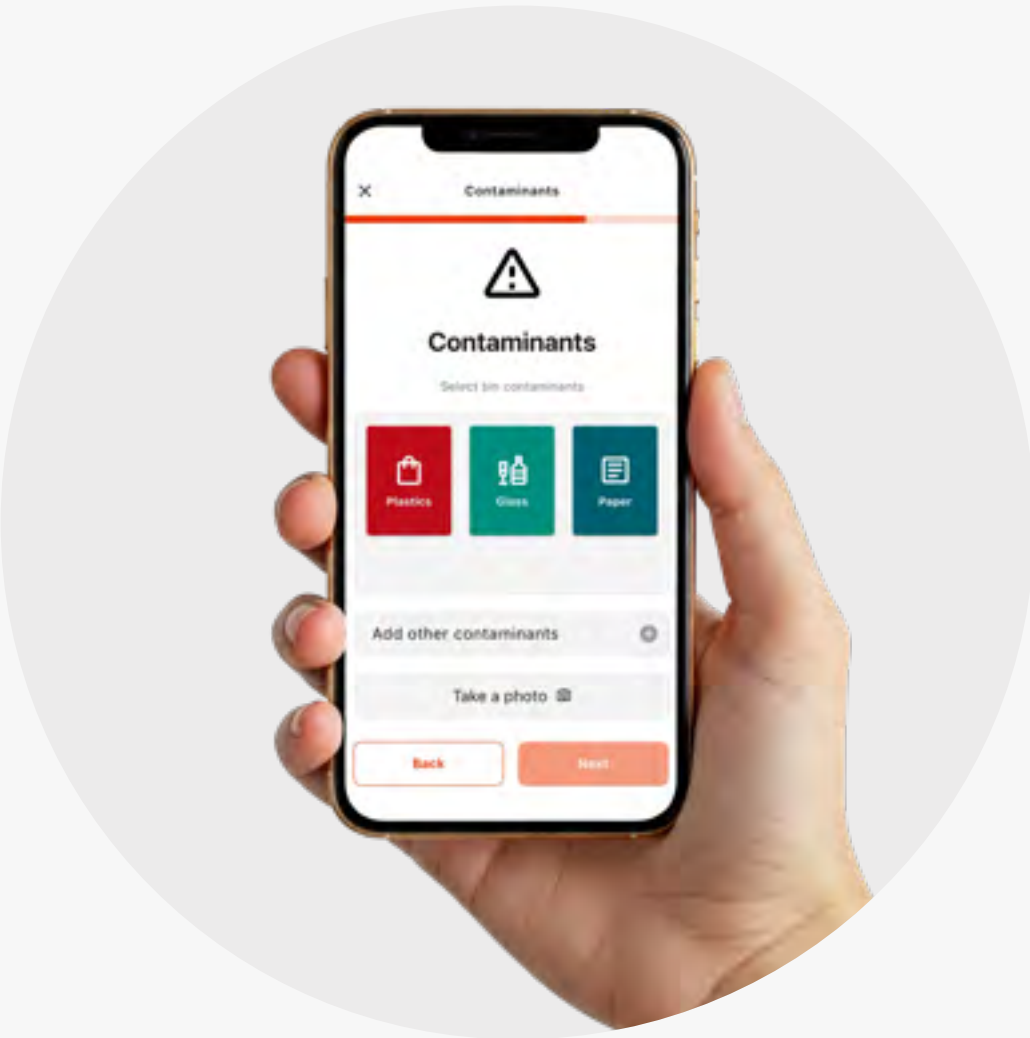

2. Scan the Station

When emptying the bin stations, the cleaner scans the QR code on the station to confirm the exact location.

3. Scan the Bag

The cleaner scans the bag QR code & confirms the waste stream removed.

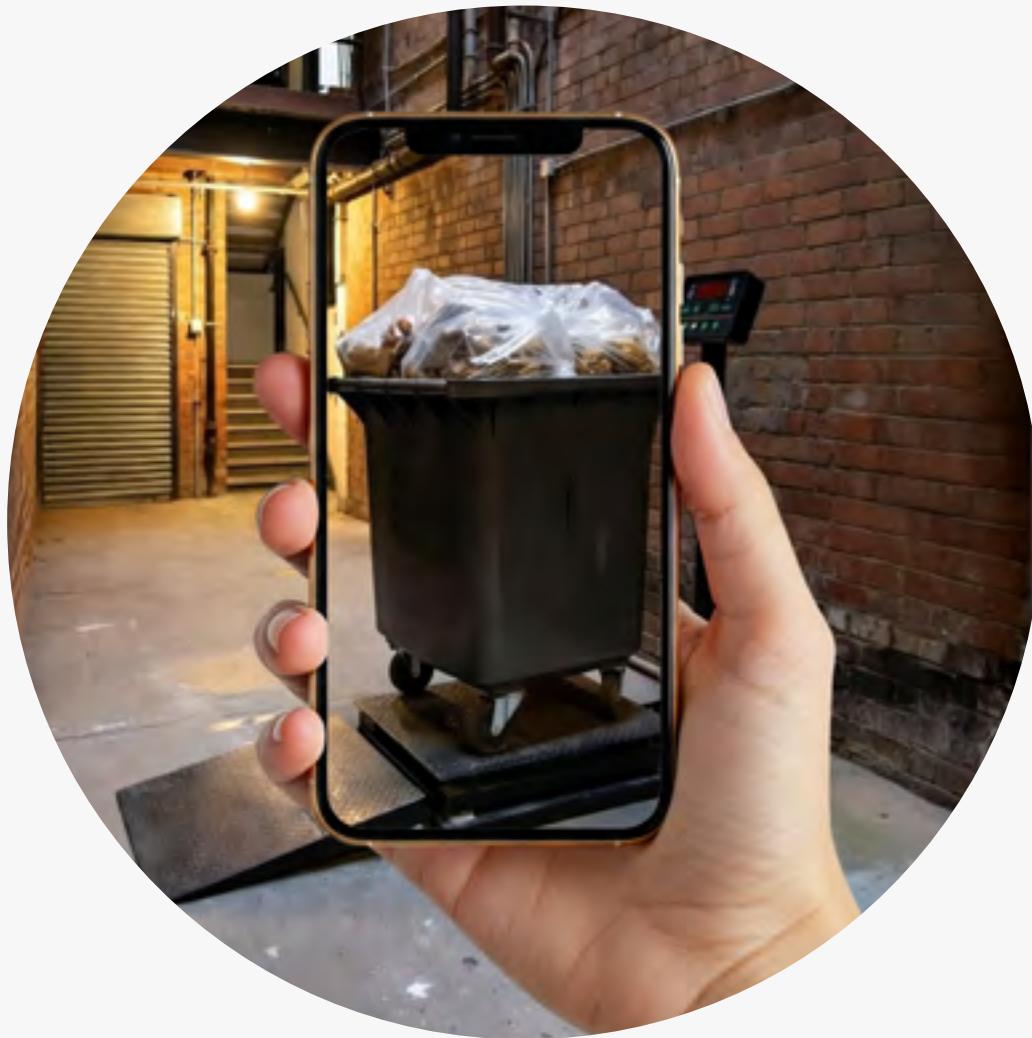

4. Report Contamination

The cleaner can report contaminated waste (e.g. food, liquids).

5. Record with Photo

The cleaner can take a photo to support the contamination report, if required.

6. Weigh & Record

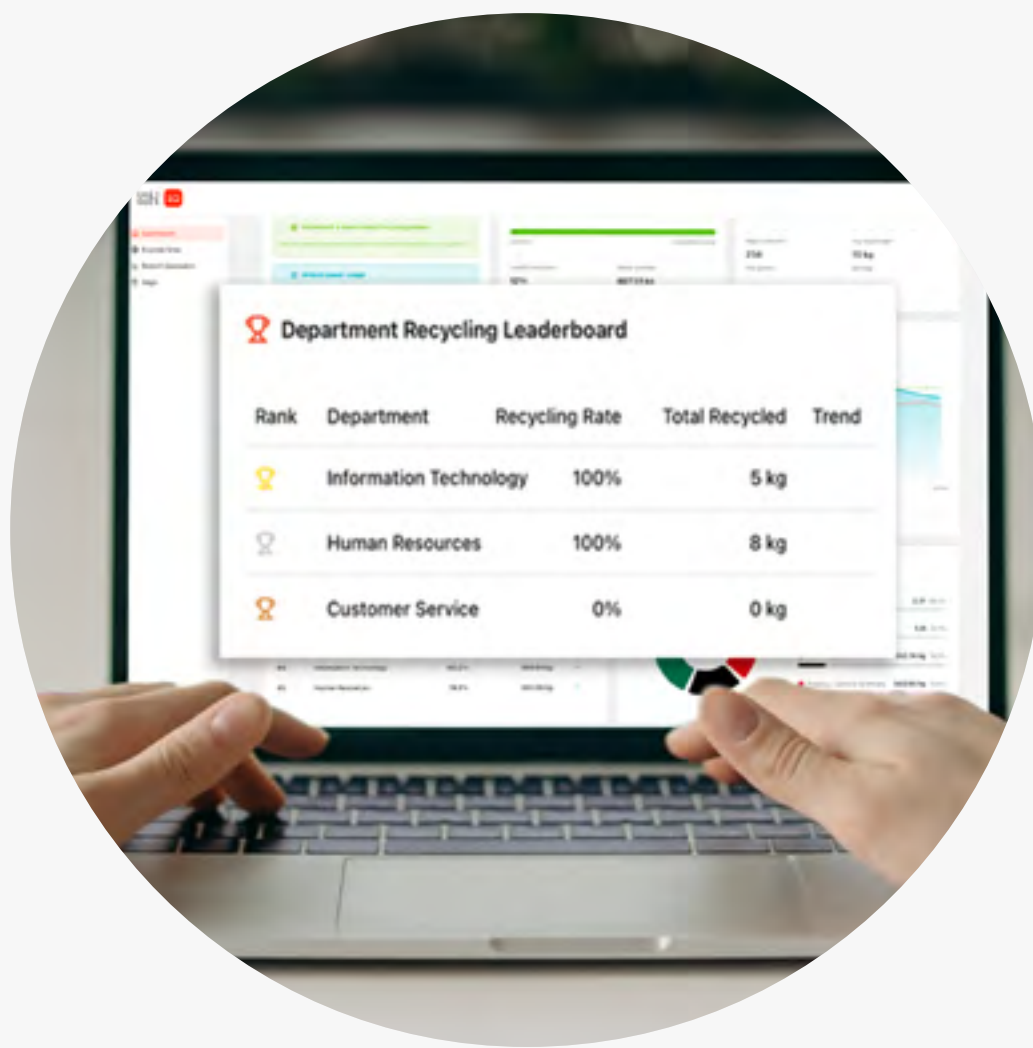

Scan the bag and place on the scales for an accurate reading which is synced with the waste type in Unisort iQ.

Powerful Data to Enable Better Decisions

7. Live Dashboard

Access real-time recycling performance and waste metrics from any bin location.

8. Granular Comparison

Easily compare performance between specific floors, departments, or entire buildings.

9. Smart Reporting

Generate professional, audit-ready management reports and PDF summaries with a single click.

10. Optimise & Save

Use RAG statuses and "Estimated Savings" data to drive recycling rates up and costs down.

Digital Waste Tracking

Mandatory from October 2026

UK legislation will require digital records of waste movements, replacing paper-based tracking.

What's Changing

- Paper waste notes phased out
- Digital reporting becomes mandatory
- Clear audit trails required

Why It Matters

- Compliance must be proven
- Estimates won't be enough
- Data accuracy becomes critical

Digital Waste Tracking

Mandatory from October 2026

How Unisort iQ Helps

- Captures waste data digitally at source
- Tracks waste by site, floor & stream
- Track contamination back to the source, with evidence
- Produces audit-ready reports

Prepare Now

- Reduce compliance risk
- Improve recycling performance
- Be ready for day one

Unisort iQ provides you with digital waste data - ready for 2026.

The Impact

Reduce Contamination

Real-time education improves waste quality

Increase Recycling Rates

Better engagement = better segregation

Transparent Data

Building, floor, department & cleaner-level insights

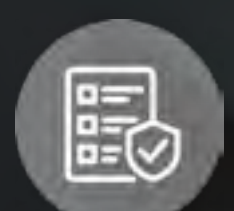

Lower Carbon Footprint

More recycling = less CO₂ released

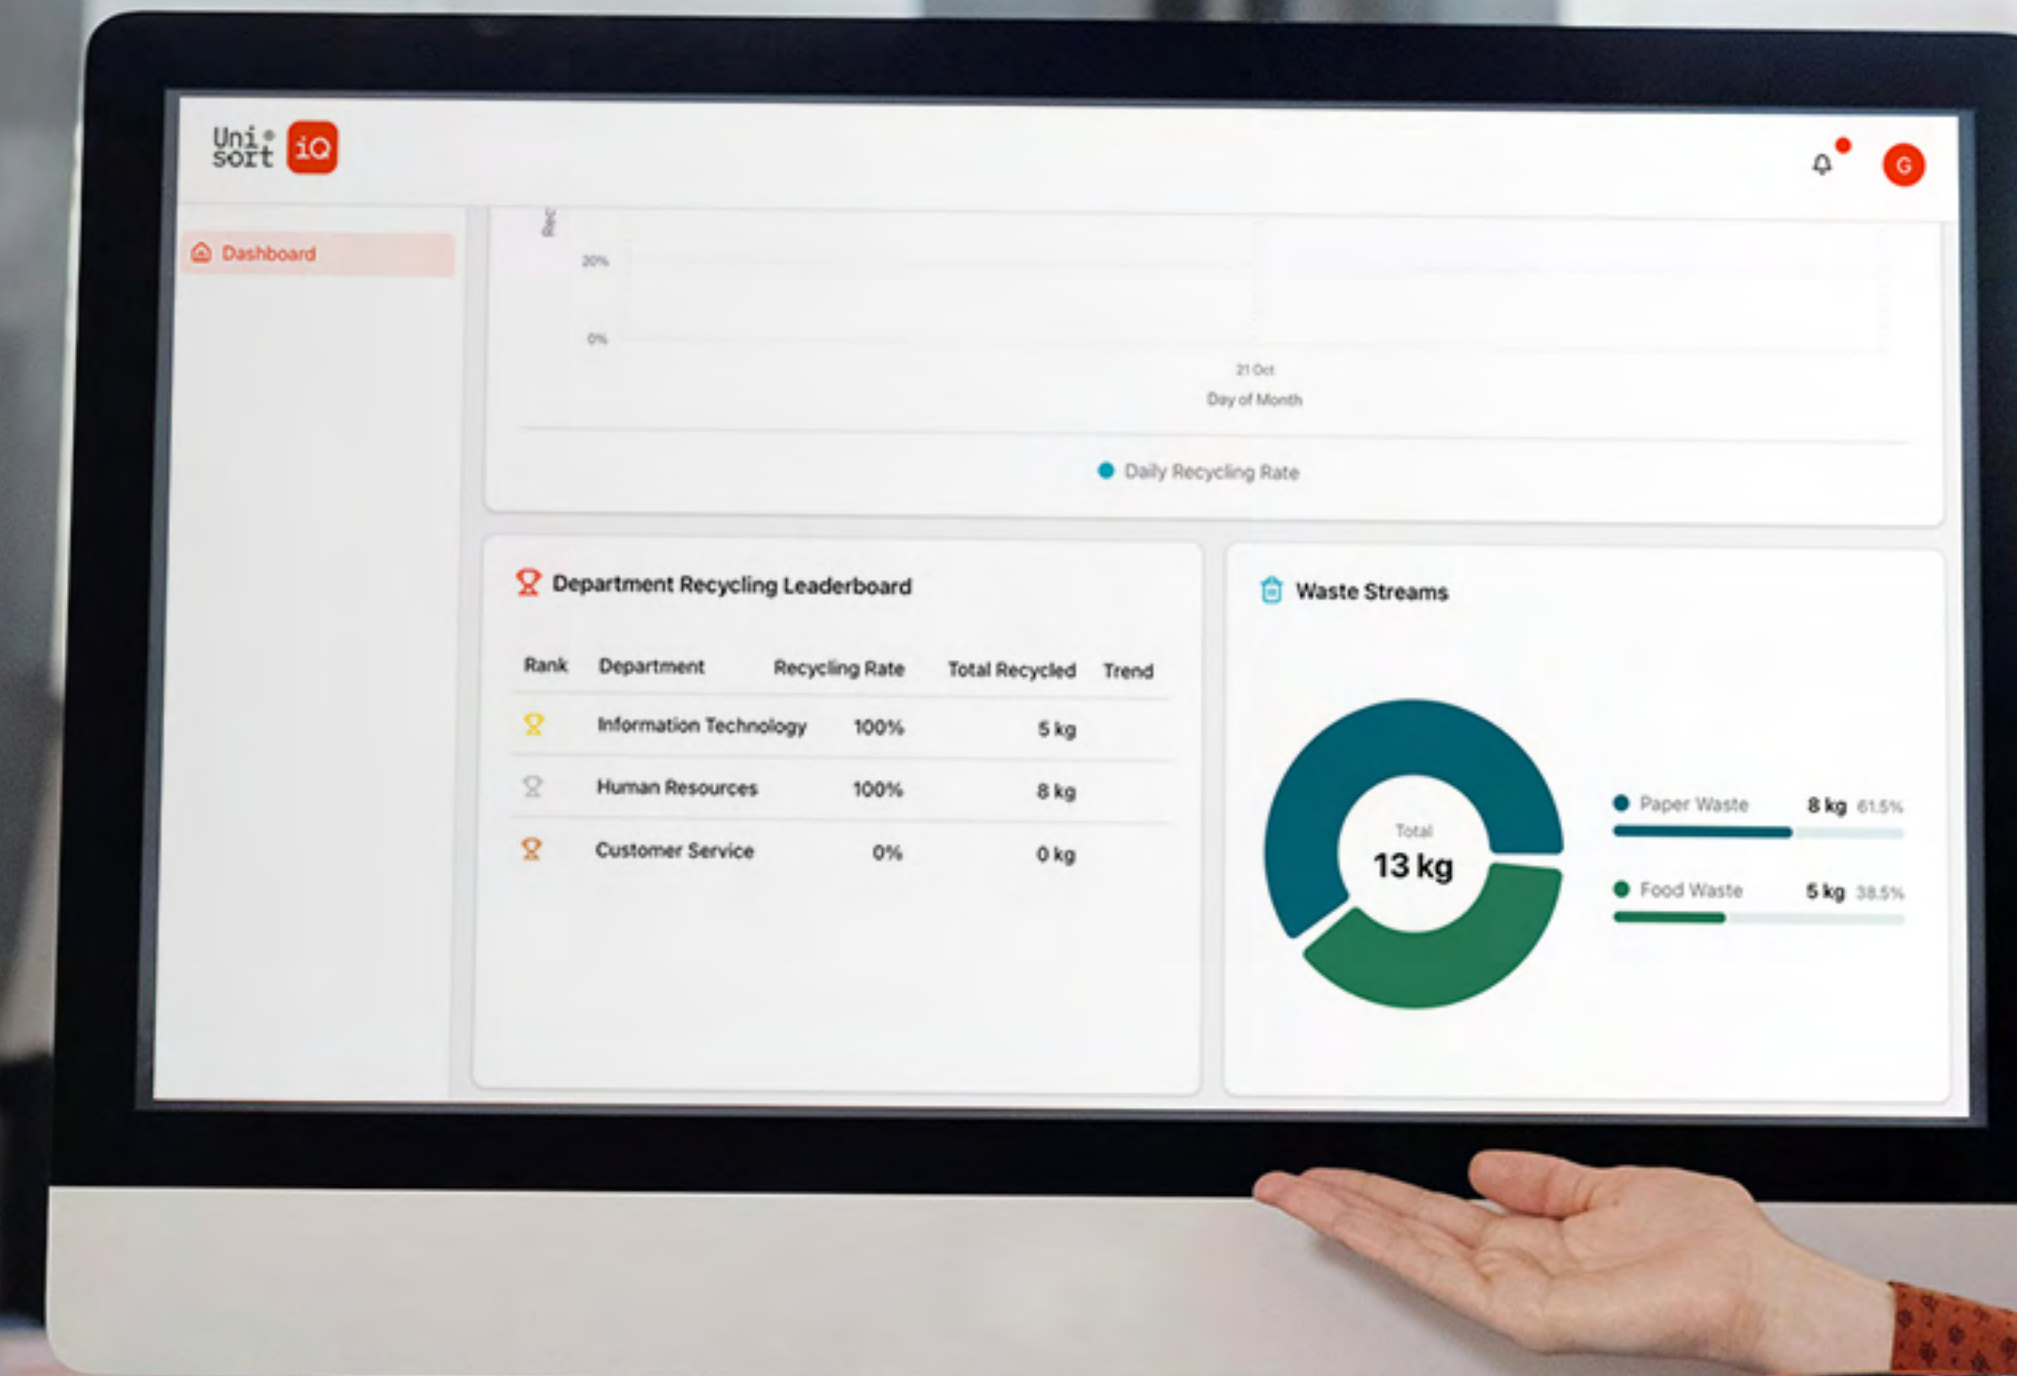

Improve Contractor Accountability

Track actual performance, not just reported totals

Ensure Compliance

with current legislation

Find Out More

The Unisort Range

Unisort Aspire

Our flagship customisable recycling stations.

Unisort Climate

An overview to the Unisort Climate range and options.

Unisort Cup Collector

Our dedicated cup collecting recycling station.

Unisort Liner System

The bin liner system that reduces your plastic wastage and emissions by 80%.
