

Unisort iQ

Workplace Waste Intelligence

Better Data.
Better Recycling.

Turn waste data into
measurable performance
improvement

The Challenge

Most organisations don't have clear visibility of their waste

Common frustrations our customers face are:

- Poor recycling behaviour
- High contamination rates
- Limited visibility across buildings and floors
- Inconsistent data from waste contractors
- Difficulty identifying contamination sources
- Hitting a "glass ceiling" with recycling rates

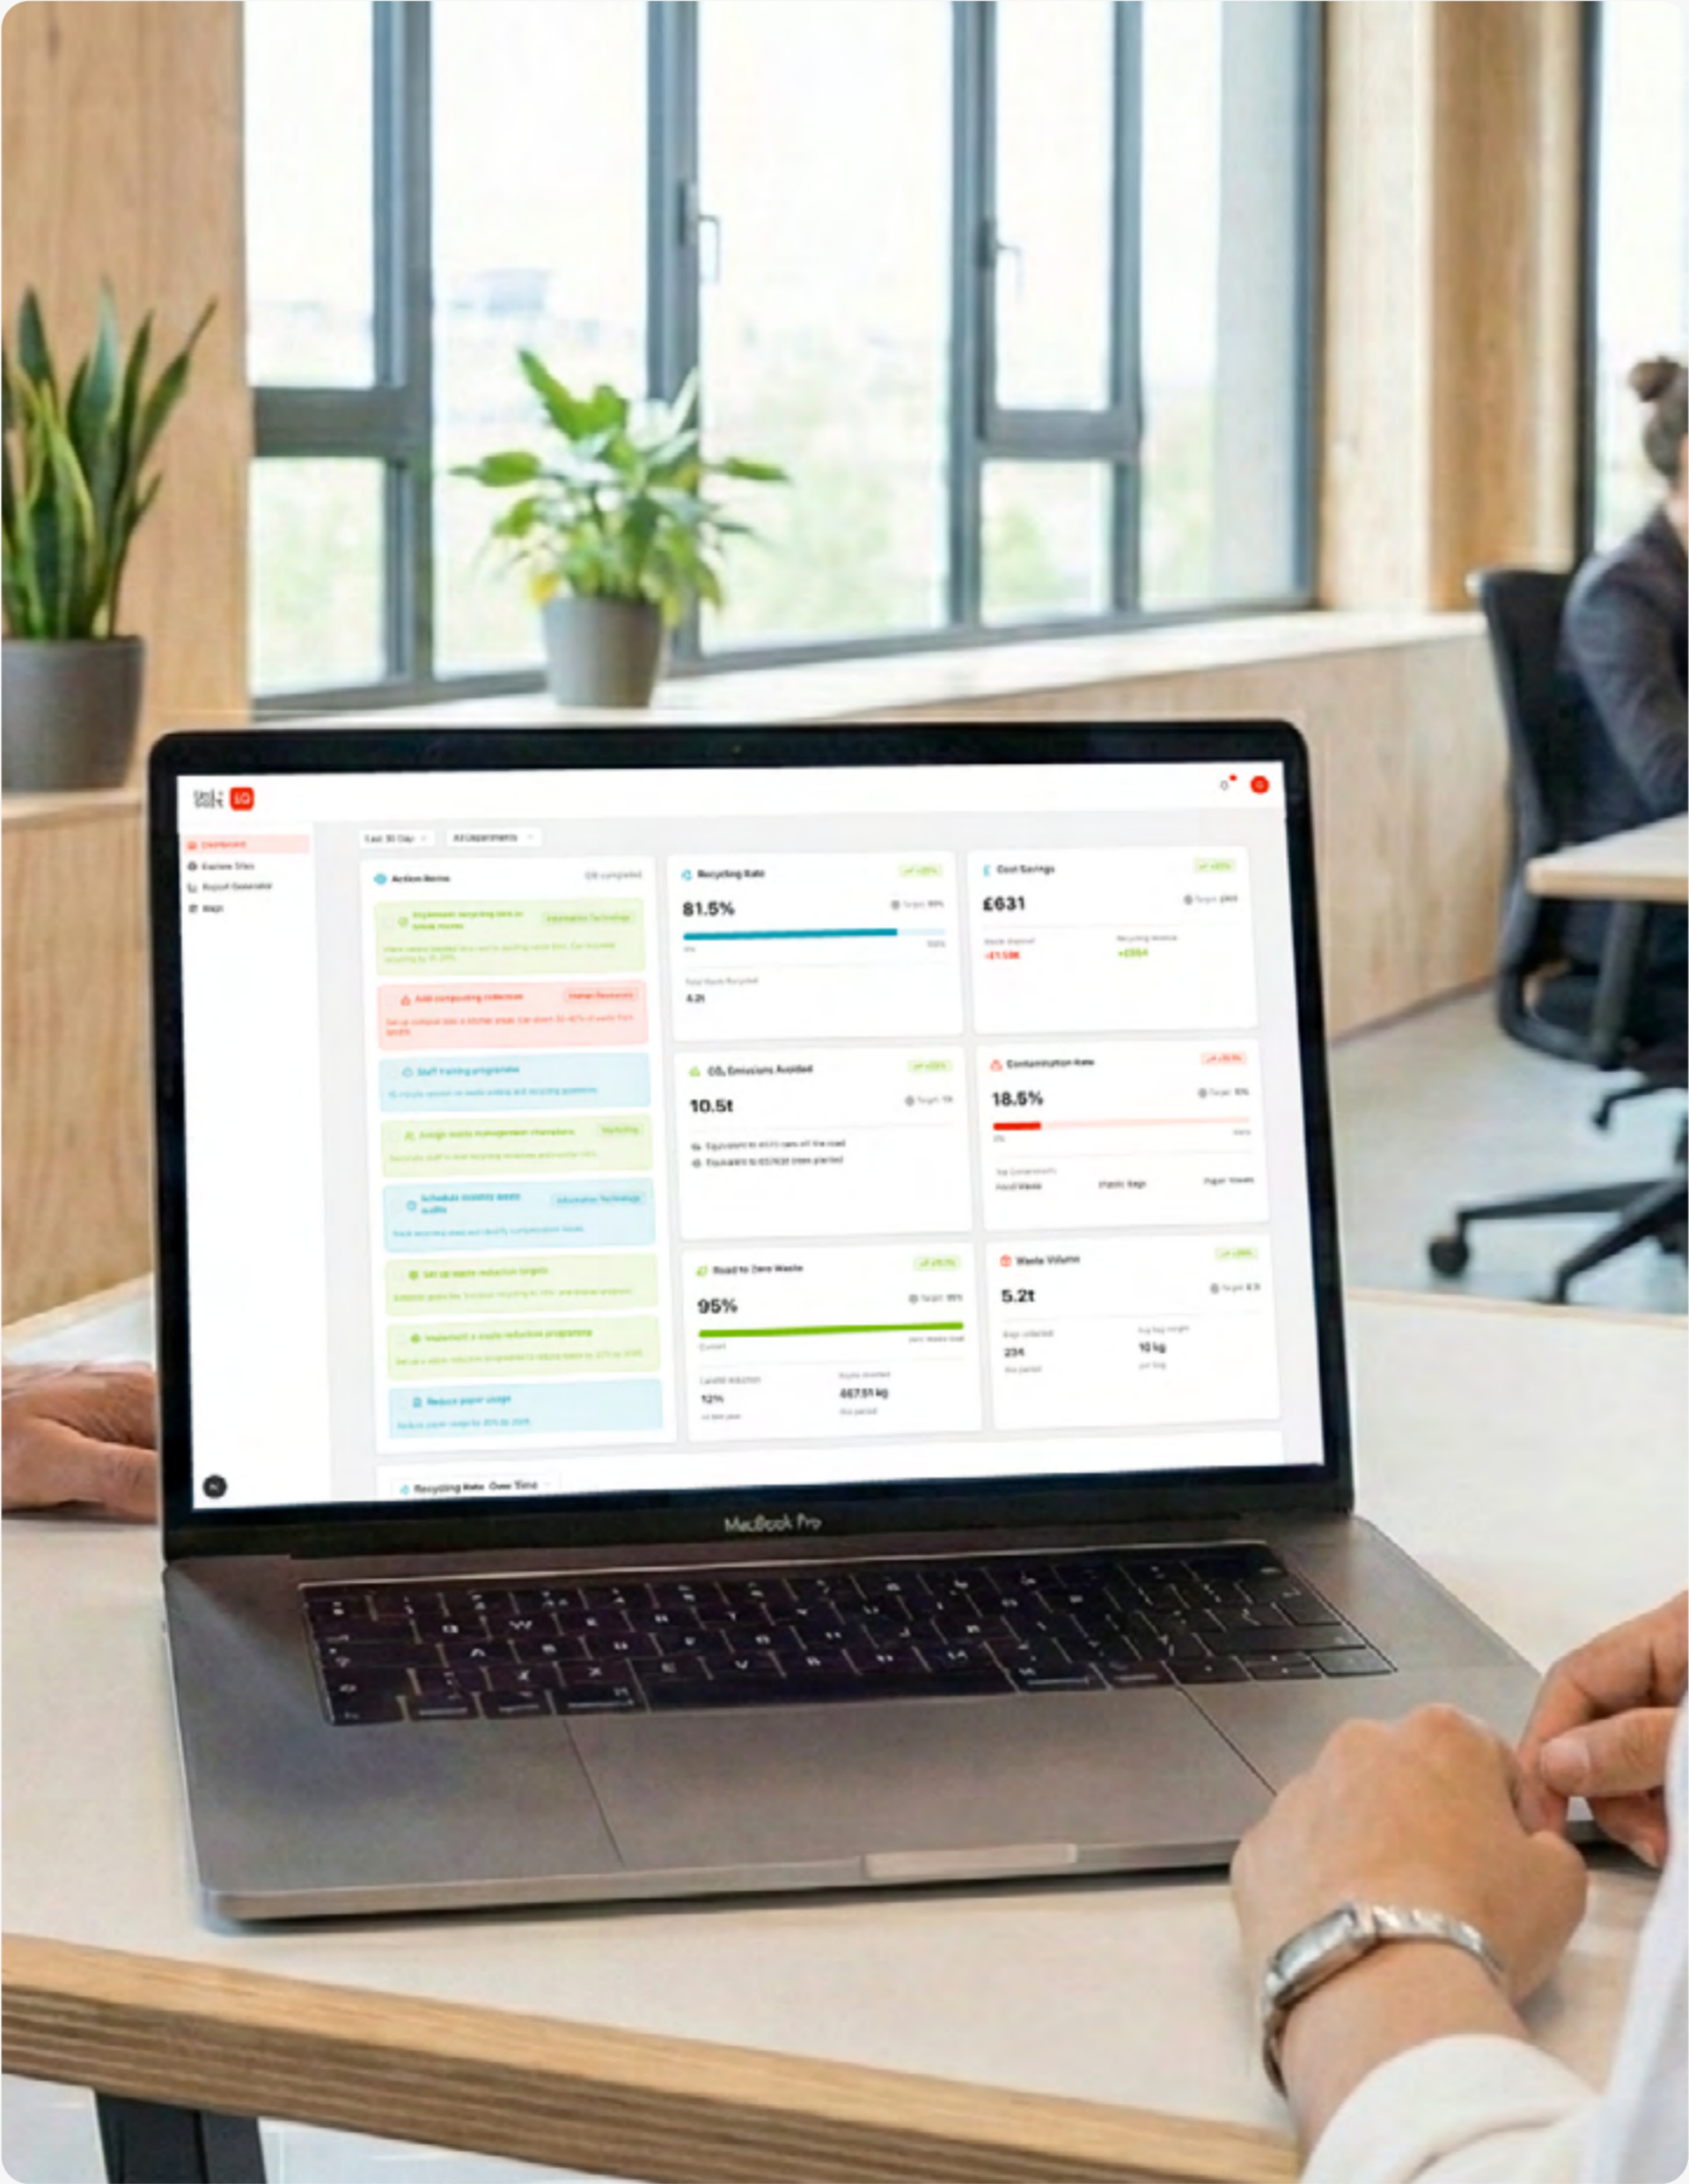

Our Solution

A workplace waste intelligence platform that captures waste data at source and provides real-time insights into recycling performance.

- Capture waste data digitally at source
- Identify contamination areas
- Track recycling performance across sites
- Generate clear recycling & compliance insights

Why Choose Unisort iQ?

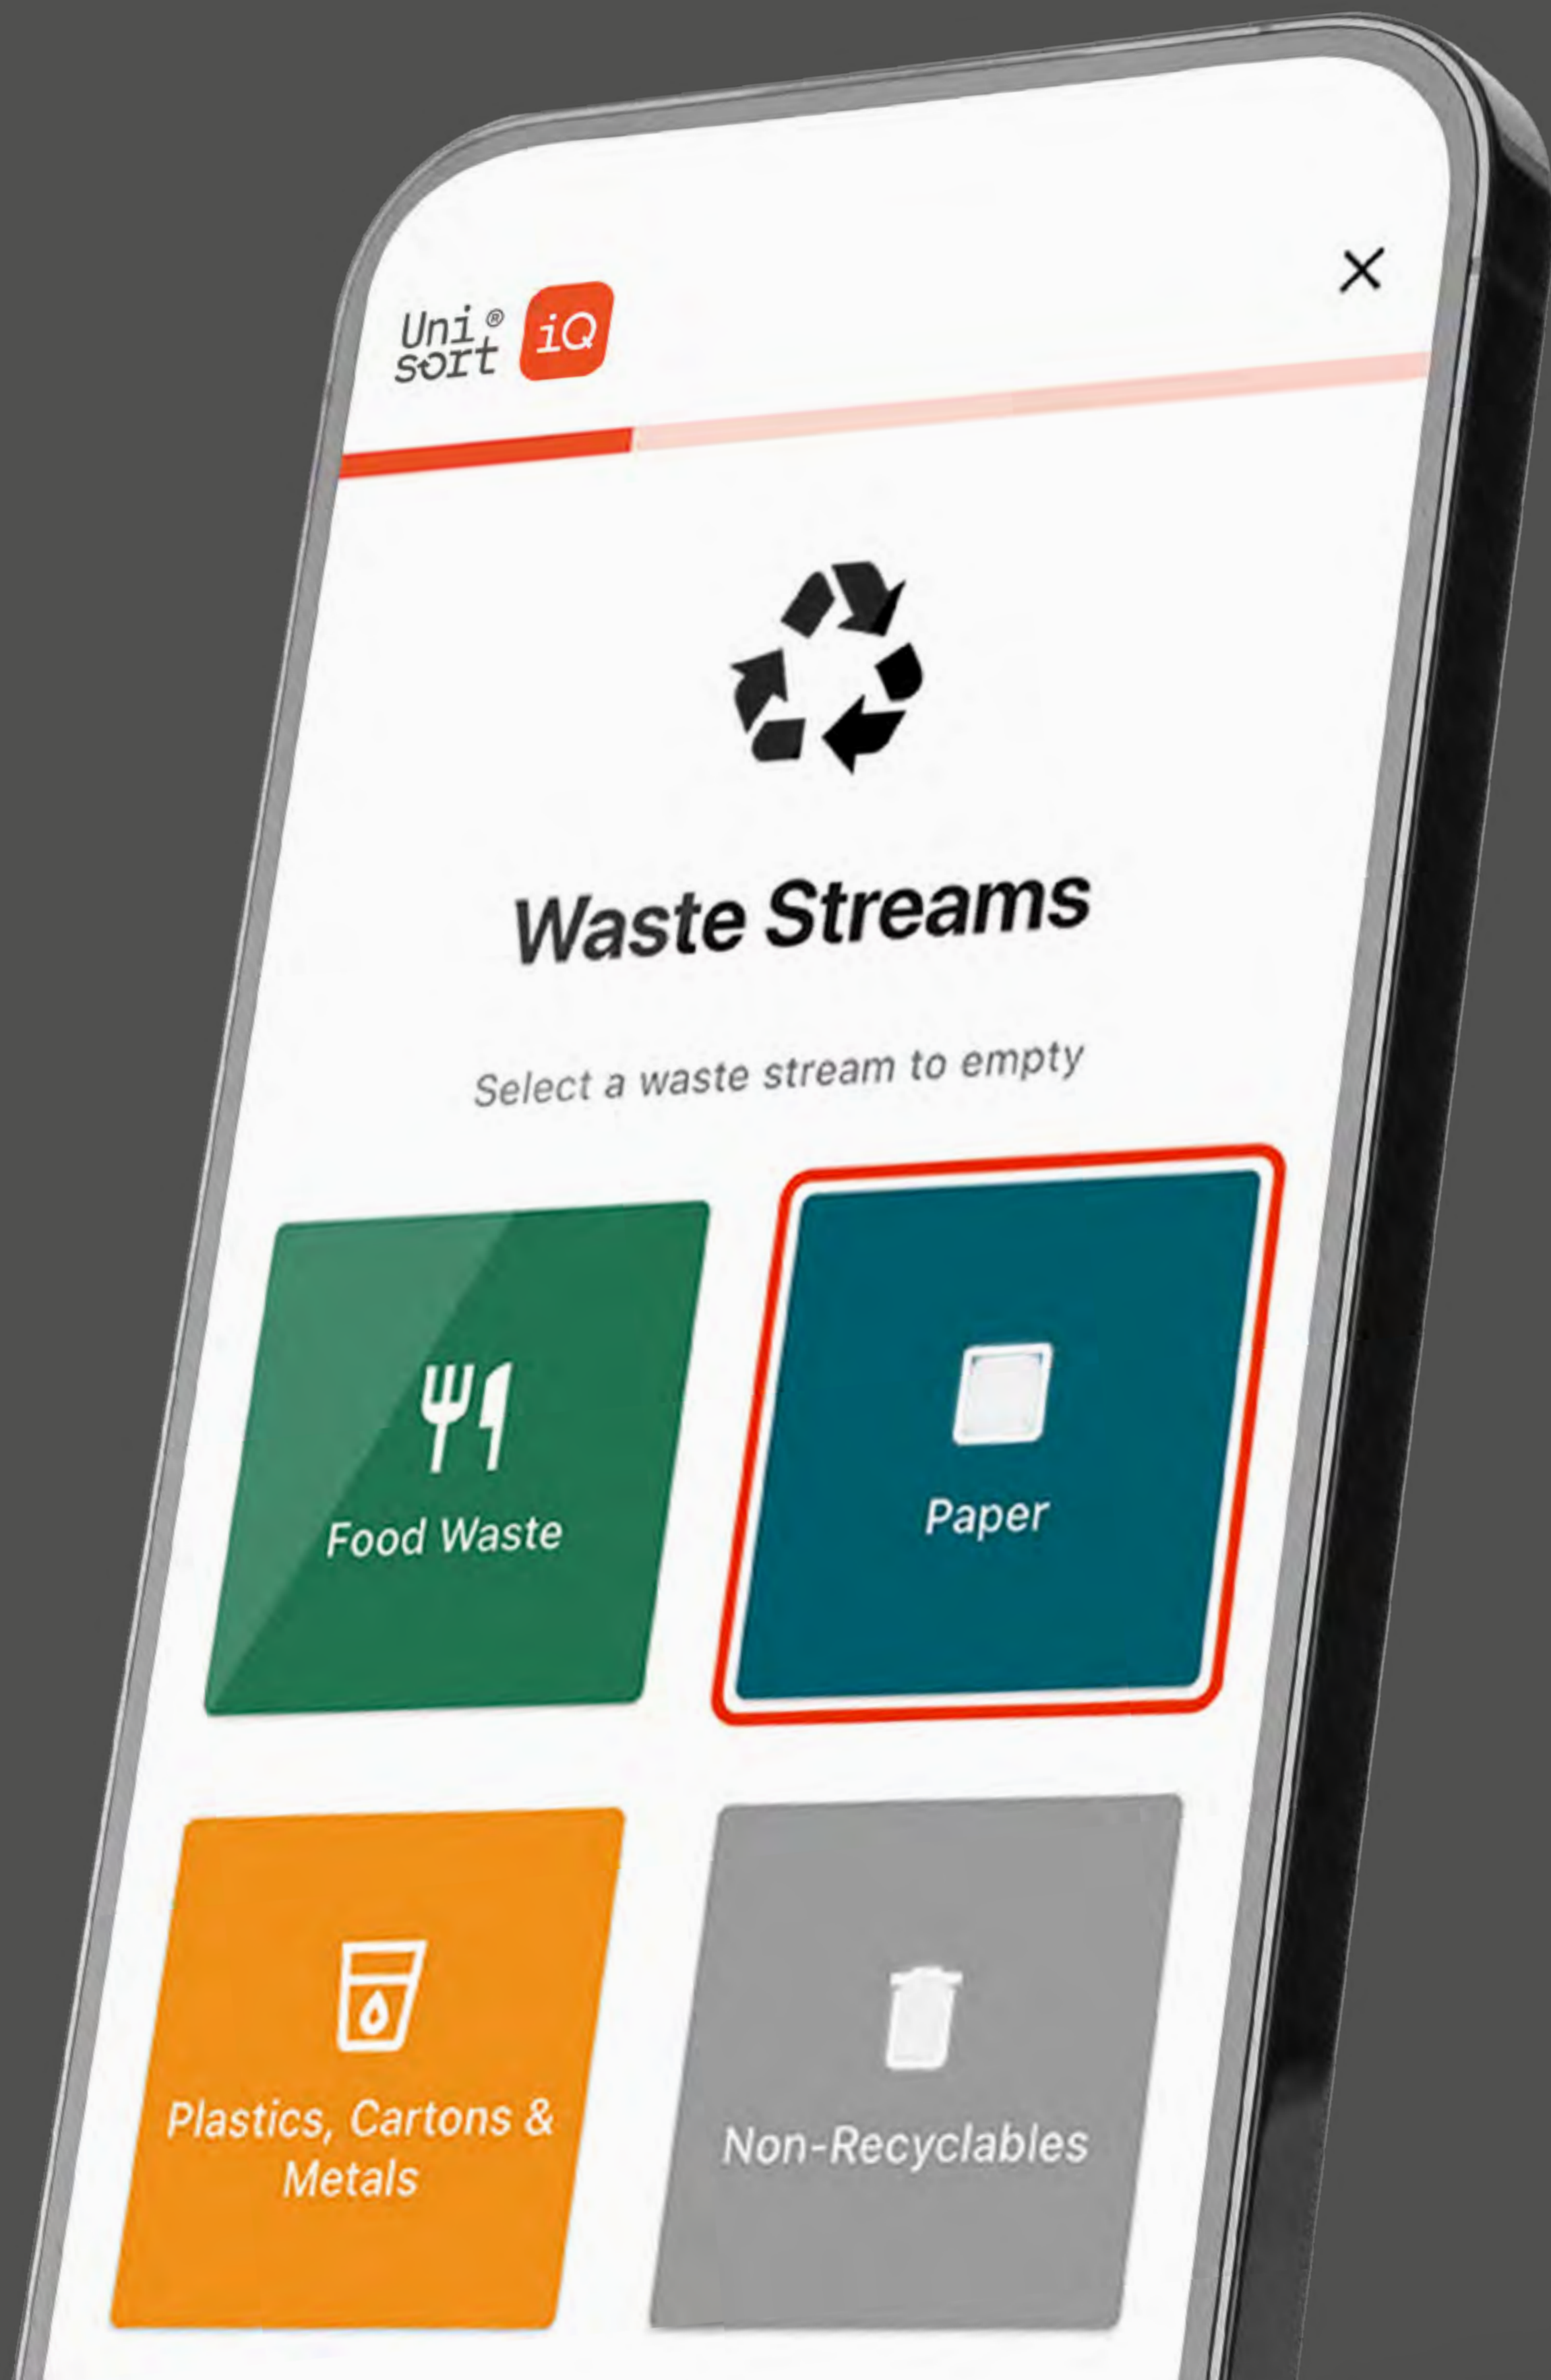

- Captures data at the point of disposal
- Tracks waste across buildings, floors and teams
- Provides reliable, audit-ready data
- Designed for multi-site operations

Who Uses Unisort iQ?

- Facilities & Sustainability Managers
- Offices & Multi-Tenant Buildings
- Universities & Colleges
- Hospitality & Food Service
- Industrial Manufacturing Sites
- Facilities Management Companies

What You Can See & Measure

Capture waste data at source

Real-time recycling and contamination insights

Cleaner accountability and audit trails

Integrated weighing and waste tracking

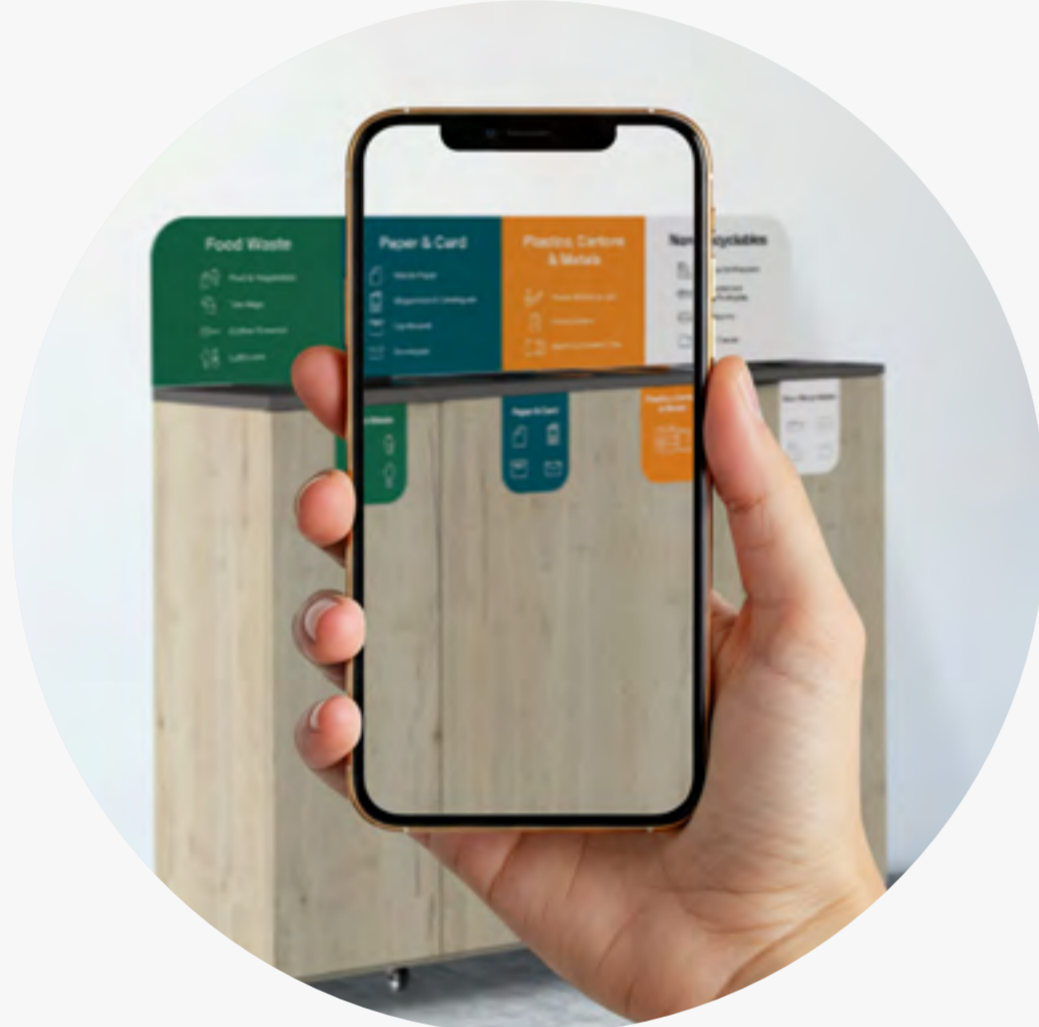

Multi-site and multi-floor performance reporting

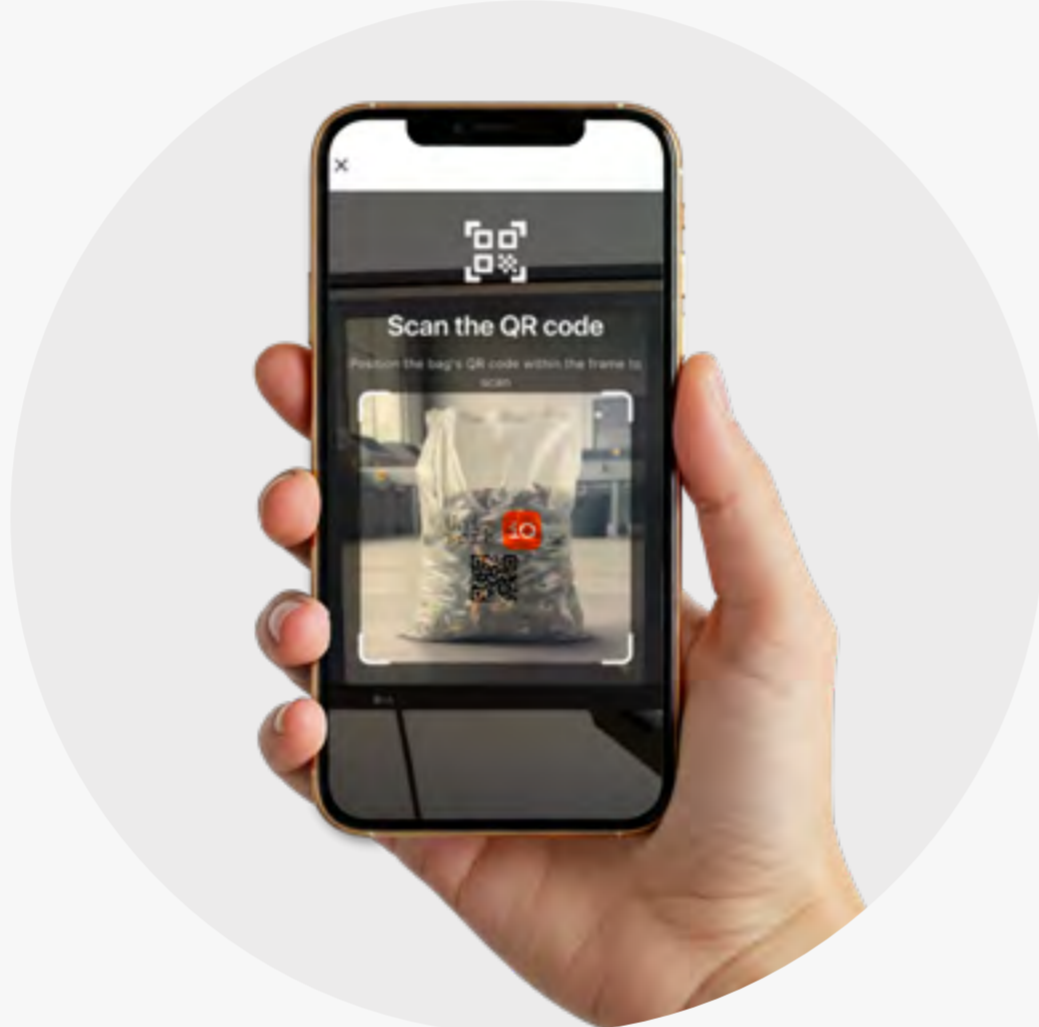

AI insights and optimisation (*coming soon*)

Simple Data Capture

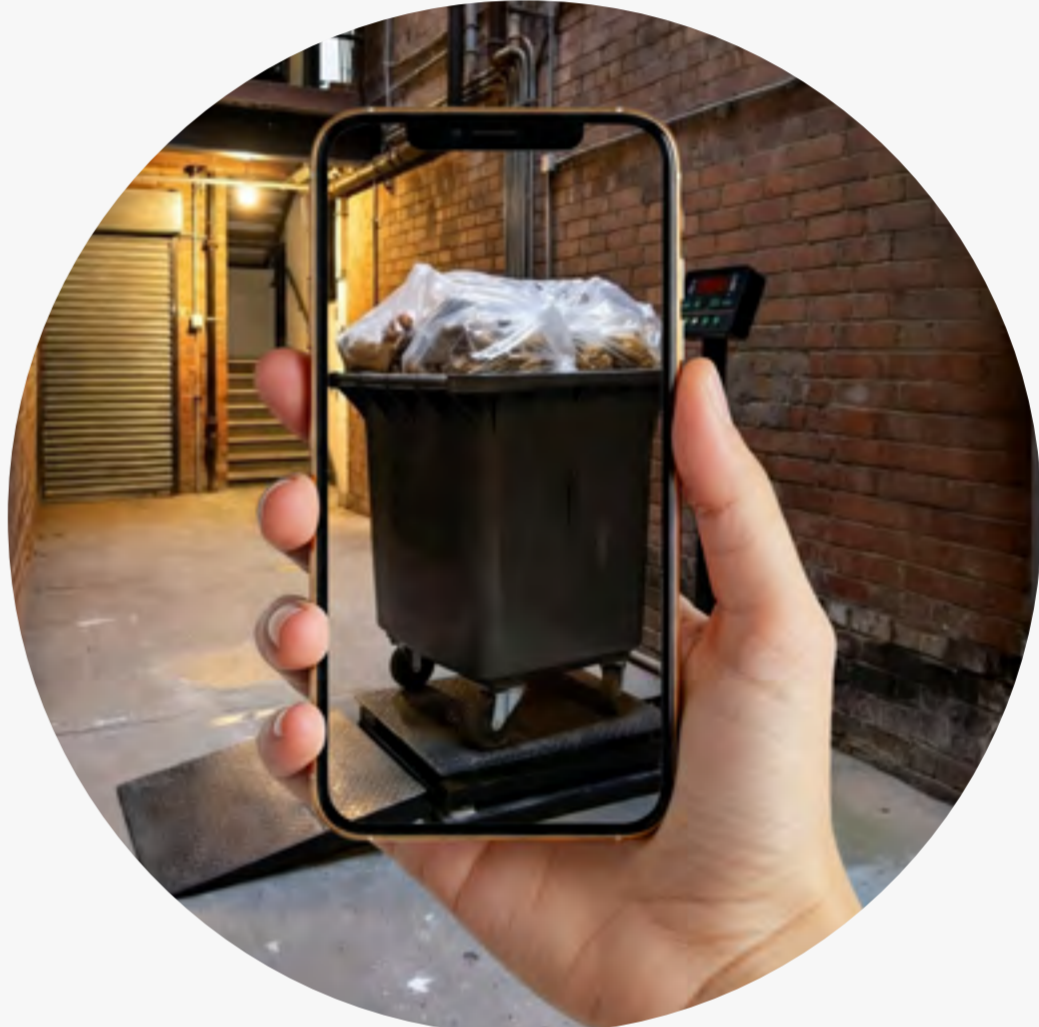

How the solution works

1. Scan the Station
The cleaner scans the QR code on the station to confirm the exact location.

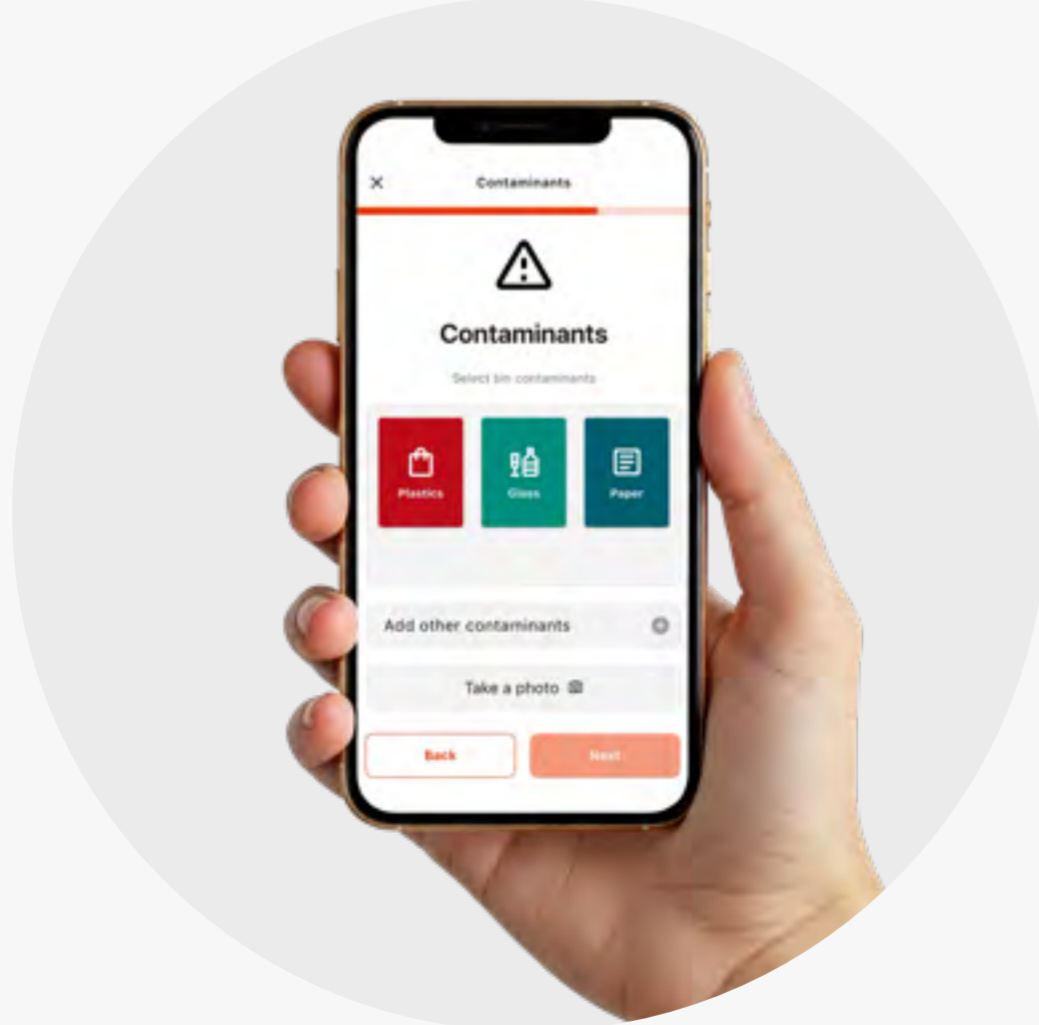

2. Scan the Bag
The cleaner scans the bag QR code & confirms the waste stream removed.

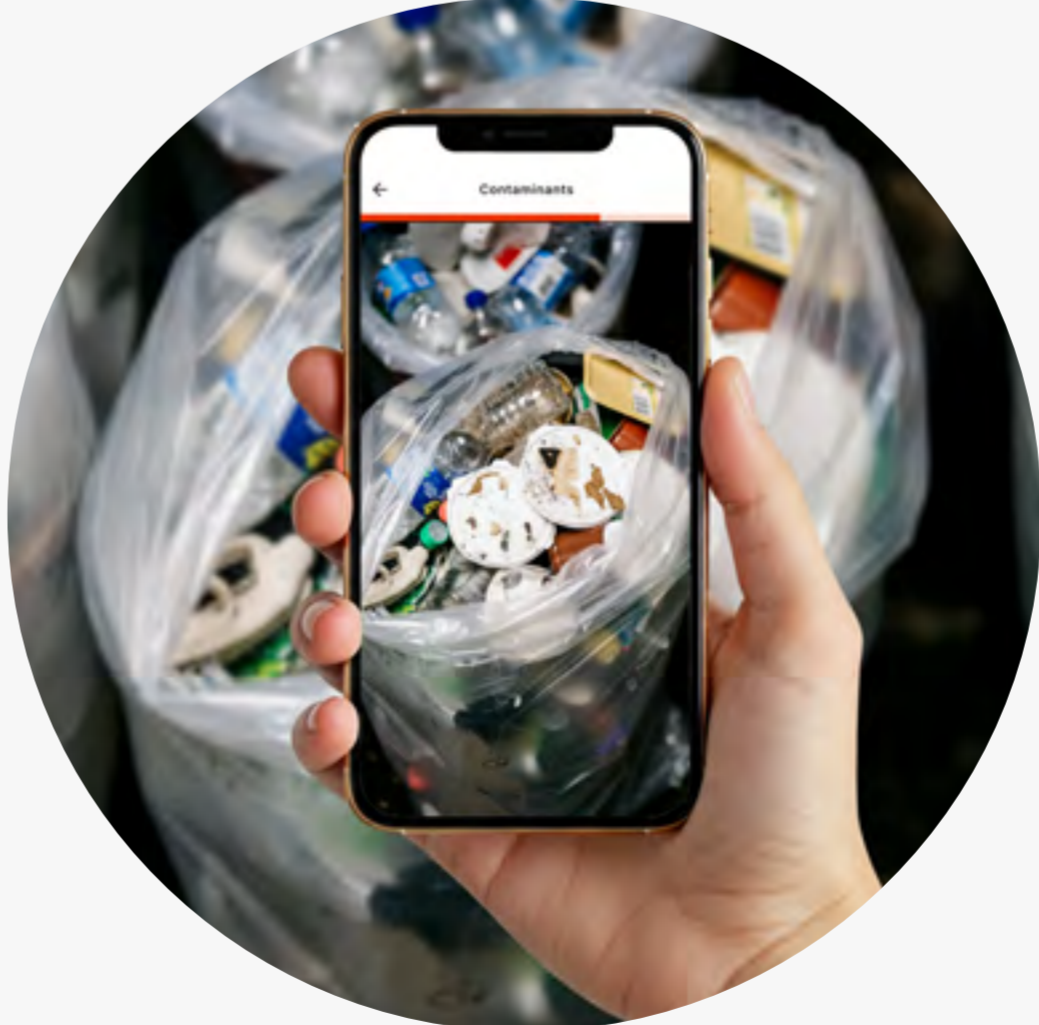

3. Weigh & Record
Scan the bag and place on the scales for an accurate reading which is synced with the waste type in Unisort iQ.

Optional Steps:

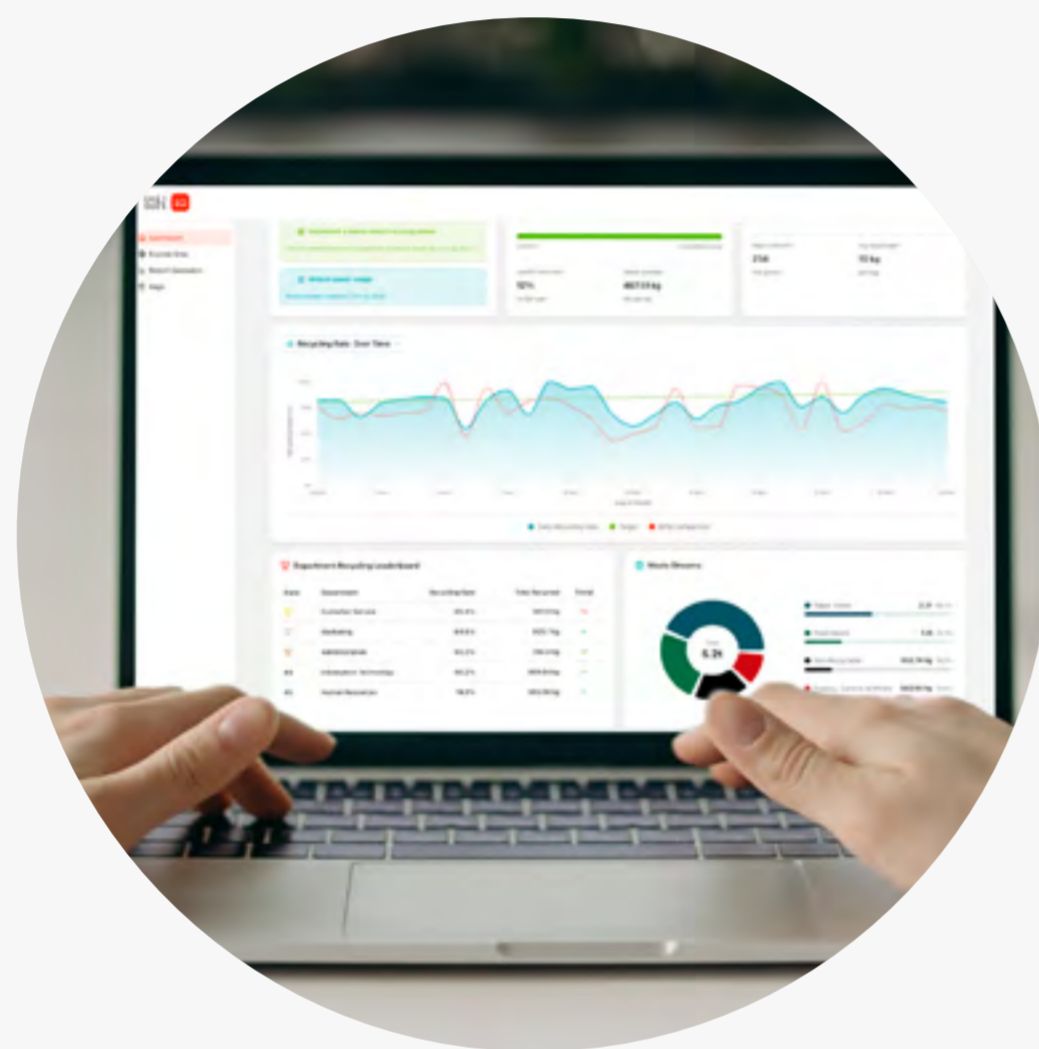

4. Report Contamination
The cleaner can report contaminated waste (e.g. food, liquids).

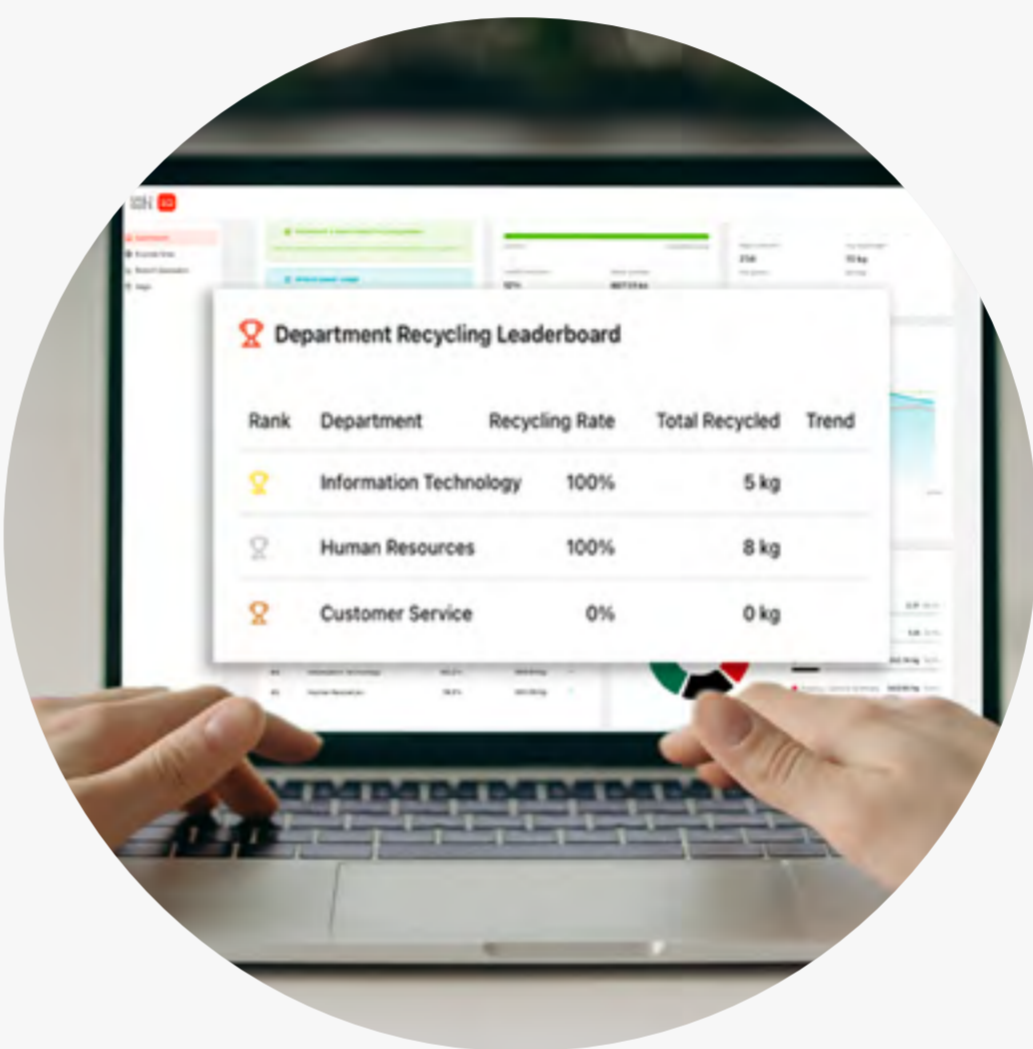

5. Record with Photo
The cleaner can take a photo to support the contamination report, if required.

Better Data. Better Decisions.

6. Live Dashboard

Access real-time recycling performance and waste metrics from any bin location.

7. Easy Comparison

Compare buildings, floors or departments.

Rank	Department	Recycling Rate	Total Recycled	Trend
1	Information Technology	100%	5 kg	▲
2	Human Resources	100%	8 kg	▲
3	Customer Service	0%	0 kg	▼

8. Smart Reporting

Generate audit-ready sustainability reports.

9. Optimise & Save

Drive recycling rates up and costs down.

Waste Volume		▲ +25%
18.01 kg		● Target: 22 kg
Bags collected	Avg bag weight	
234	10 kg	
this period	per bag	

Digital Waste Tracking

Mandatory from October 2026

UK legislation will require digital records of waste movements, replacing paper-based tracking.

What's Changing

- Paper waste notes phased out
- Digital reporting becomes mandatory
- Clear audit trails required

Why It Matters

- Compliance must be proven
- Estimates won't be enough
- Data accuracy becomes critical

Digital Waste Tracking

Mandatory from October 2026

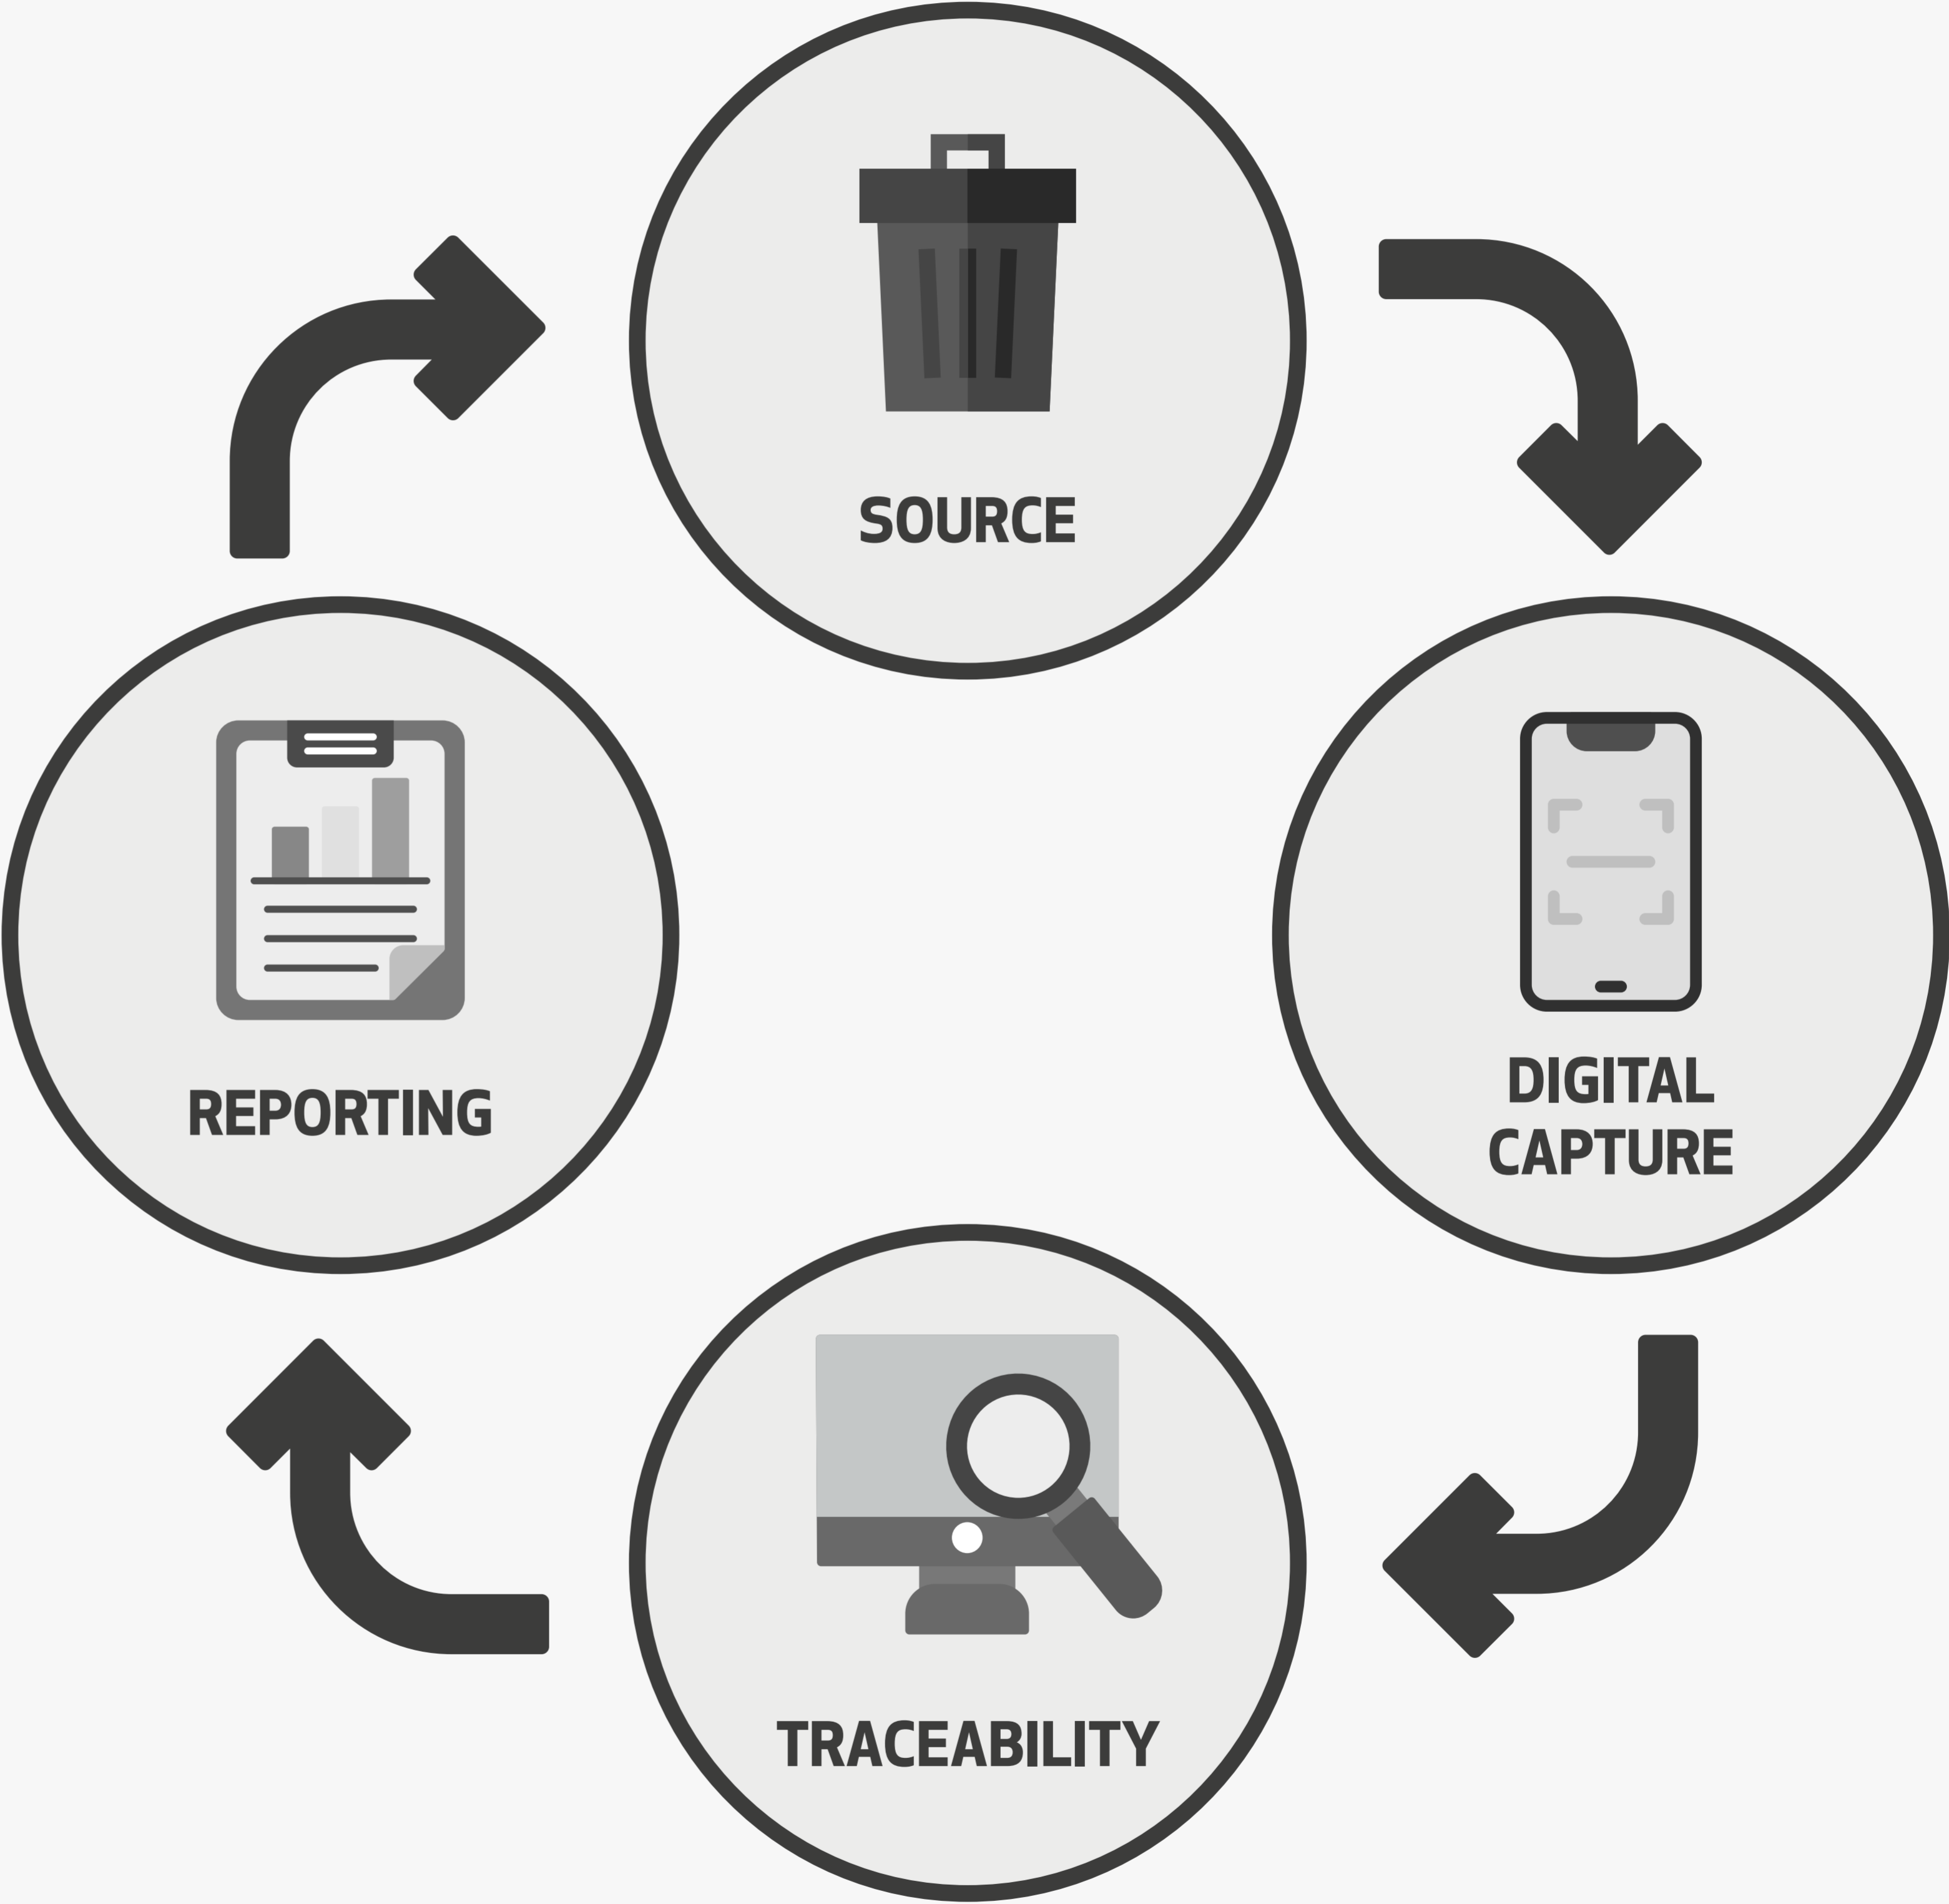

How Unisort iQ Helps

- Captures waste data digitally at source
- Tracks waste by site, floor & stream
- Track contamination back to the source, with evidence
- Produces audit-ready reports

Prepare Now

- Reduce compliance risk
- Improve recycling performance
- Be ready for day one

Unisort iQ provides digital waste intelligence - ready for 2026.

What Unisort iQ Delivers

Transparent Waste Data
across your building or estate

Reduce Contamination
with real-time guidance

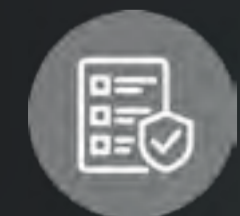

Increase Recycling Rates
through better engagement

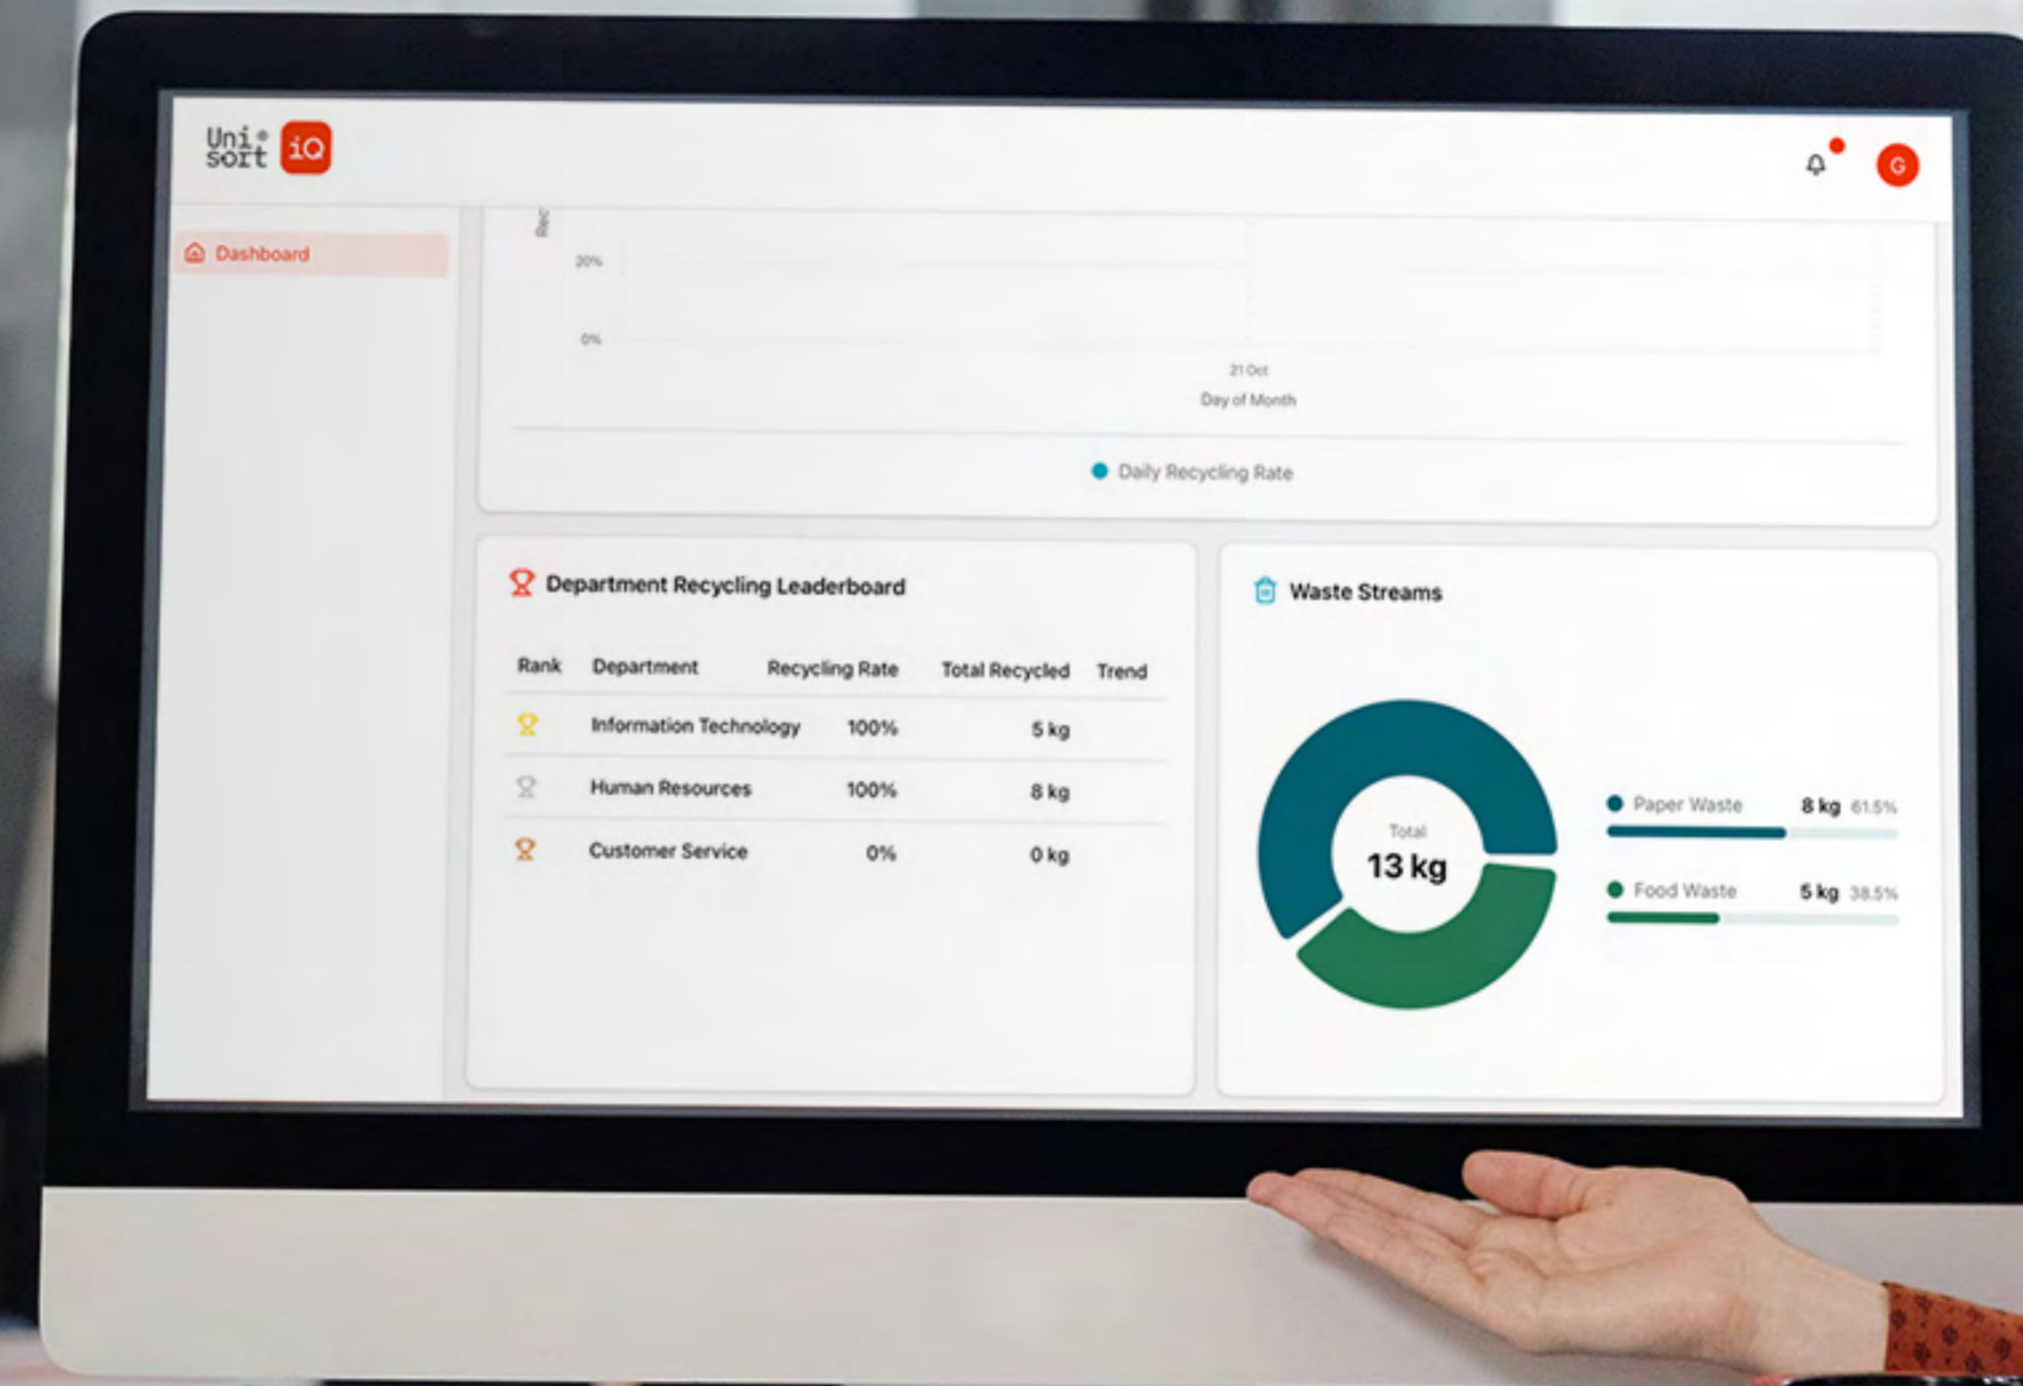

**Improve Contractor
Accountability**

Reduce Carbon Impact
through improved recycling

Demonstrate Performance
in compliance and sustainability

Find Out More

The Unisort Range

Unisort Aspire
Our flagship customisable recycling stations.

Unisort Climate
An overview to the Unisort Climate range and options.

Unisort Cup Collector
Our dedicated cup collecting recycling station.

Unisort Liner System
The bin liner system that reduces your plastic wastage and emissions by 80%.
